NAPANEAN IN EGYPT

Abbasia, Cairo, Egypt.

August 17th, 1915

Dear Mother and Father:-

On Saturday 7th we saw a village for the first time since leaving England, it appeared to be built of stone, without order or arrangement, there seemed to be a mosque on a hill behind the village.

On Sunday Aug. 8th we called at an island where we were to get further orders, but they had not even heard that we were coming, so had to wireless back to headquarters for instruction. We lay off the island about five hours, while there we saw a battleship and some destroyers. I would like to tell more but dare not, if I want this letter to reach you.

We had church service at 8.30 a.m. and a communion service at 6 p.m. for all the protestants. On Monday 9th Lt. Col. Connell gave us a lecture on "Tropical Hygiene".

He said we must not eat much fruit and be very careful about it being very clean and fresh, also eat very little meat.

In the afternoon we saw some flying fish for the first, they would leap out of the water and sail along for fifty or sixty feet, then dive again. Wednesday morning 11th saw us in the harbor at Alexandria, the boat rocked a lot in the wind on Tuesday but I did not mind it. We worked hard all Thursday a.m. getting off baggage that belonged to other people.

It was hot as the "dickens" on deck and several degrees hotter down in the hold. We were allowed to go up street from 3 p.m. until 8 p.m., where we had our first glance at oriental life, women with veiled faces, all kinds of eastern stores all open in front, different oriental dresses such as you see in pictures.

There were a number of Australians around too. I would like to tell of military matters but dare not.

On the 13th I worked very hard all day, from 6.30 until 11.30 I bossed a party of ten down in the aft hatch, and cleaned out all our stuff.

In the afternoon I had to look after all the nurses' luggage, see that it was unloaded and all checked up.

Then I took a party down into the middle hold to help finish there.

After supper I had no work to do, so went out on the dock to watch natives handle boxes and etc. that belonged to our bunch.

It was as good as a circus to hear them yelling and quarreling about how heavy the boxes were and etc. They are very strong however, I saw one fellow carrying a box of stationery that must have weighed 500 lbs., anyway for I helped carry it from the bottom of the ship.

There was a ship unloading wounded just near us, a lot of the fellows from India, they are short, dark, tough looking men with features somewhat like the Chinese.

About 2 p.m. on Saturday 14th we

You can hardly realize how hot it is here, it is something like standing in the middle of the road at home the blazing sun on the hottest day is like that all over, there is grass just dust or sand.

This school building is very fine there are three large buildings two stories high, one behind the other with covered passage ways joining them.

The R.A.M.C. men have a monk which is very funny, also have a p and the two play together.

On the morning of the 16th we left the school building and came up the hill about five miles, but instead of marching we came on street cars which brought us quite near our destination. At present we are waiting for further orders, as we are not sure whether we stay or not. We were just in the midst of cleaning up our quarters when we were told to stop working, twenty men were sent back to the school to help the R.A.M.C. for week, the rest of us are doing nothing.

This building is supposed to be the finest one for soldiers in the empire and I think they would be if the were clean, but the bed bugs are terror, no one slept inside last night so we have escaped so far.

In each barracks there are three stories, the first floor is used as storeroom etc.

Each of the two top stories has two large rooms with beds for twenty-four men each, there is also a nice washroom with shower bath etc. on each floor.

The surrounding country is desolate absolutely with coarse sand and no shade, there are loads of flies a over Egypt, as far as I can see, the all seem to be present when we eat it reminds me of Sask.

I had a shave in the native barbershop belonging to the barracks here it was fine and cost half a piastre 2½c.

The system of money is quite like the Canadian a piastre is 5c. also ½ piastre piece, a milieme ¼c. There are coins worth ¼c. I do not know the name, the larger coins are piastre (10c.) 5 piastre (25c.) 1 piastre (50c.) 20 piastre (100) 1 piastre (250c.).

A ride on the train costs 2 milieme (1c.) a muskmelon costs 2½c. but is dangerous to eat them for fear of dysentery so I don't indulge there a nice drinking fountain near, where ice cold drinks made from spring water can be bought at 2½c.

I will mail this now and write more another day.

Yours lovingly

(Sergt.) KENNETH M. SHOREY

EXECUTOR'S NOTICE TO CREDITORS.

In the estate of Frank Henry Carson, deceased.

Notice is hereby given pursuant to Chapter 121 of the Revised Statutes of Ontario, 1914, Section 56 and amending Acts, that all persons having any claims or demands against the estate of Frank Henry Carson, late of the Town of Napanee, in the County of Lennox and Addington, Harness-maker, deceased, who died on or about the 4th day of August, 1915, are required to deliver or send by post pre-notice to Nora E. Carson, Napanee, Ontario, one of the Executors of the last will and testament of the said Frank Henry Carson, deceased, on or before the 27th Day of September, A.D. 1915, their Christian and surnames, addresses and descriptions with full particulars of their claims or demands duly verified, and the nature of the security (if any) held by them.

And further take notice that after the said 27th day of September, A.D. 1915, the said executors may proceed to distribute the assets of the said estate amongst the persons entitled thereto, having regard only to the claims or demands of which they shall then have received notice, and shall not be liable for the said assets, or any part thereof so distributed, to any person or persons of whose claims or demands they shall not have received notice at the time of the distribution thereof.

U. M. WILSON,
Solicitor for the said Executors.
Dated this 31st day of August, 1915.

CENTREVILLE.

There was a large crowd in attendance at our "World's Fair" held here on Saturday.

The concert given in the hall on the same evening was also a decided success. The talent being principally local.

The Township School Fair will be held here on Monday next.

Quite a number of our local sports were on Mud Lake, early on Wednesday morning, in quest of ducks, this being the first day for shooting them. We understand the ducks were terribly frightened but nothing serious occurred to them.

Several from this vicinity attended the County Fair at Napanee on Wednesday.

P. Evans shipped a load of cattle to Toronto on Saturday morning.

Very little threshing has been done around here yet.

Mower grinders, scythe stones, grindstones, hay forks, rope and pulleys. BOYLE & SON.

Children Cry FOR FLETCHER'S **CASTORIA**

so went out on the dock to watch natives handle boxes and etc. that belonged to our bunch.

It was as good as a circus to hear them yelling and quarreling about how heavy the boxes were and etc. They are very strong however, I saw one fellow carrying a box of stationery that must have weighed 500 lbs., anyway for I helped carry it from the bottom of the ship.

There was a ship unloading wounded just near us, a lot of the fellows from India, they are short, dark, tough looking men with features somewhat like the Chinese.

About 2 p.m. on Saturday 14th we started to march two miles to the station, to take train for Cairo.

It was the hottest walk I ever had, in the hot sun with our heavy clothes and kits. We left Alexandria at 4 p.m., the cars were so full, there was no place for myself and a few others to ride except the platform so I rode a part of the way on top of the car, so I could see more, we arrived at Cairo at 7:20, a very good run, as it is 127 miles.

The trip was very interesting, the country is very flat, for it is the Nile delta.

They have a wonderful system of irrigation. There are big ditches every little ways (one on each side of the railroad all the way) and from these lead off smaller ditches, the fields are very small and little furrows run all through them just a few yards apart.

To get the water onto the land, there are, at the corner of the fields, water wheels turned by oxen or camels hitched to a sweep, and travel in a circle. The sweep is fastened into the crotch of a tree or upright and the stump of the tree passes through a wheel, the spokes of which stick beyond the rim nearly a foot and act as cogs to turn the water-wheel which is upright and seems to be hollow with holes in the sides to allow the water to run in from the ditch, then empties it into a trough and thus over the land.

There are thousands of these wheels over the country and each field can be irrigated when necessary. I have read that the land is the most fertile in the world and it certainly looks it.

The crops I recognized were corn, millet and cotton, there was other stuff which I did not know.

On each side of the large canals along the track there is a road on which travel was pretty brisk at that time of day, people on donkeys or camels, on foot or in a carriage.

The water is quite muddy, and we saw several dead asses floating in it, nevertheless women were washing cloths on the banks and children were in bathing.

The natives live in mud villages. If the Israelites had to live in such houses when they were here, I don't blame them for wanting to go to the land flowing with milk and honey, for they look indescribably dirty.

After unloading at the station here we marched another two miles out to a girls school building which is now a hospital run by the R.A.M.C.

They gave us the best meal we have had in some time roast beef, roast chicken, green peas etc.

Then I had a shower bath and general clean up and slept outdoors on a bunch of kit bags, as there was no room for us inside, about 600 patients there now.

Tropical uniforms were issued to us in the morning they are light in color and weight, the helmets are just like you see in pictures, we still have puggarees to get for them, it is something like a puttee and is wound around the hat as a protection from the sun.

can be bought at 25c.
I will mail this now and write another day.

Yours lovingly

ERINSVILLE.

A few campers are still enjoying the beauties of Beaver Lake.

A quiet wedding took place at the Church of the Assumption when M Marguerite Evans became the bride of Vincent Donaghue, Centreville.

Miss Mary Quinn, Watertown, Y., is visiting at her parental home.

Several from this locality attend the party given the boys of the Agricultural Class of Tamworth.

Edward McKeown has returned from the Frisco Exhibition.

J. P. Finn, Ottawa, inspected Roman Catholic school here on Wednesday.

Messrs. E. Burns and Harry Gleeson, Napanee, have returned home after week's camping along the lake.

Mrs. V. McCarey and son, Joseph, spent the past week at John McNeil.

W. McPherson, Peterboro, spe Labor Day in town.

Mr. Harpell, Kingston, is visiting his daughter, Mrs. Michael Hopkins.

Miss Alice White returned to Brooklyn, N.Y., on Friday.

DENBIGH.

Mrs. J. W. McGuinness with her infant daughter, was for a couple weeks a welcome guest of her parents.

Mr. and Mrs. A. John have returned to Belleville, their present place of residence.

Denbigh has lately lost temporarily quite a number of its farmers' sons and daughters.

Norris Ready, Herman Berne, Otto Klien and Albert Falk left with the last harvesters excursion for harvest fields of Saskatchewan, a Miss Anna John, Alma Wienec, Louise Berndt and Mary and Clara Falk left for Napanee, where they tend to enjoy town life for a while.

Miss Katie Marguardt has been engaged to teach school in Bancroft and Miss Cora Stein is teaching school section No. 4 (Eagle Hill school) of Denbigh, and Mr. R. F. Allan, Sharbot Lake, is the present principal of our village school.

Quite a number of members of the Lutheran congregation spent last Sunday in Raglan to attend the missionary services conducted there by Rev. C. F. Christiansen of Denbigh, and Kasdorff, of Arnprior.

The weather was exceptionally fine for the occasion and the large new church was well filled at each service. Appropriate sermons were preached in German by Rev. Kasdorff and in English by Rev. Christiansen.

Mr. and Mrs. C. F. Marquardt, Hardwood Lake, paid a visit during the week to friends and relatives in the vicinity.

Mr. Wm. John who was away at Douglas assisting his son, Harry, with his harvest has returned home again.

Several losses of sheep and lambs presumably by bears have lately been reported.

NAPEE EXPRESS

\$1 per Year in advance: \$1.50 if not so paid.

NADA—FRIDAY, SEPTEMBER 17th, 1915

You can hardly realize how hot it is here, it is something like standing in the middle of the road at home in the blazing sun on the hottest day, it is like that all over, there is no grass just dust or sand.

This school building is very fine, there are three large buildings two stories high, one behind the other, with covered passage ways joining them.

The R.A.M.C. men have a monkey which is very funny, also have a pup and the two play together.

On the morning of the 16th we left the school building and came up here, about five miles, but instead of marching we came on street cars which brought us quite near our destination. At present we are waiting for further orders, as we are not sure whether we stay or not. We were just in the midst of cleaning up our quarters when we were told to stop work, then twenty men were sent back to the school to help the R.A.M.C. for a week, the rest of us are doing nothing.

This building is supposed to be the finest one for soldiers in the empire, and I think they would be if they were clean, but the bed bugs are a terror, no one slept inside last night so we have escaped so far.

(Sergt.) KENNETH M. SHOREY.

LENNOX FALL FAIR

The Lennox Agricultural Society Fall Fair was held on Tuesday and Wednesday of this week. All classes of exhibits were well filled with the exception of the merchants' displays, which were mostly conspicuous by their absence. The attendance was nearly up to former years.

The Directors were disappointed in their efforts to secure a squadron of cavalry to visit the fair. An unusually large number of fine horses were shown, and the ladies' work was exceptionally fine.

THE BABY SHOW.

The following babies carried off the prizes in the baby contest:

For best baby girl, under one year—Ruby Pearl Brooks, daughter of Mrs. Irvine Brooks, Dorland.

Madelene Thompson, daughter of Mrs. Amos Thompson, Napanee.

Emma May Storms, daughter of Mrs. Henry Allen Storms, Napanee.

For best baby boy under one year—Charles Edward Hearns, son of Mrs. David Hearns, Napanee.

Earl Warner, son of Mrs. Geo. Warner, Napanee.

Everett Withers, son of Mrs. Almond Withers, Bath.

Dr. Ming's special—Best baby in the show:

Vernon Joyce, son of Mrs. Stanley Joyce, R. M. D. No. 3, Napanee.

BILLION DOLLAR LOAN

Anglo-French Commission C
vulgés Its Plan in New York.

Huge Sum Will Be Borrowed
Straight Government Bonds Wit
out Any Collateral, and It Will
Spent to the Last Cent in t
United States on Wheat, Cott
Meat, and Munitions of War.

NEW YORK, Sept. 14.—The pi
sent plan of the joint Anglo-Fren
Financial Commission, it was repo
ed last night, is to borrow \$1,00
00,000 in the United States
straight British and French Gover
ment bonds without any collate
whatever.

If this vast sum is obtained,
was said, it is to be spent, to the la
penny, in the United States in pa
ment of wheat, cotton, meat, a
other commodity shipments, inclu
ing munitions of war. It will, the
re, in the opinion of financial a
uthorities, be classified as a comm
cial loan.

Whether the United States' ne
trality would be questioned shou
the bankers accept straight Gover
ment bonds as their security has be
given careful consideration. It w
said that the financiers familiar wi
the plan had every reason to belie
that the Washington Administrati
would not interfere.

The foregoing was the unanimous
opinion last night of many of t
scores of prominent bankers fro
New York and the chief cities of t
country who have visited the Co
mission at its headquarters here duri
ng the three days of its stay in t
city. As to its correctness, the me
bers of the Commission declined po
tentially to comment. All that t
Commission cared to publish as a
uthoritative was voiced by Lord Res
ing, its Chairman, who receiv
newspaper men last night for t
first time.

The outstanding feature of the s
uation that overshadowed by its t
mendous importance everything e
that has influenced the foreign c
change rates since their recent sui
began was the reported plan of t
Commission to establish its hoped-i
credit here without offering any c
lateral whatever. Some of the fin
ancers who called on the Commissi
with vague or pronounced ideas th
Great Britain and France would r
only give their notes for whatev
sum they would borrow, but wou
put up a huge collateral, dollar i
dollar of the loan, composed of a
proved American securities, we
startled by the radical proposal t
the money should be borrowed ab
olutely without collateral.

Still other financiers were prepar
for the proposal and were not su
prised.

These bankers, reflecting the i
ported views of the Commissi
pointed out that the credit of Gre
Britain and France would be back
the bonds given for the loan
credit that for generations has be
regarded as good as gold. With t
Governments of both nations star
ing back of the bonds, why, it w
asked, should there be required ad
ditional securities?

Generally, the Commission's rep
ed plan came as a distinct shock
the financial world. In all the ta
that has preceded the Commissi
arrival here, and in all the gos
that has followed it, there has be
only a whisper, now and then, t
there would be an attempt to final
a loan of such mammoth proportio
or in fact any loan at all with

This year's grain crop is estimated as the highest on record in total yield, in average per acre and in acreage.

Rev. Gregory Kernahan, former Chancellor of the Archdiocese of Toronto, died at Collingwood, at the age of 35.

The British Press Bureau announces that it has been decided to send eight parties of munition workers on a four days' visit to the trenches.

An important conference took place at Ottawa between the Militia Council and representatives of industries and finance respecting Canada's furnishing of munitions.

The steamer Pomona reports that at 10 o'clock Sunday morning it witnessed the sinking of a British steamer flying signals of the Belgian Relief Committee. Ten of the crew were rescued by steam trawlers.

In reprisal for the recent bombardments of Luneville and Compiègne by German aviators, a squadron of nineteen French aeroplanes flew over the town of Treves yesterday morning and dropped a hundred bombs on it.

The British Press Bureau announces that an aeroplane dropped bombs on the Kentish coast yesterday afternoon. Four persons were injured. The hostile machine was driven off by British naval aeroplanes.

Reservists on Burning Ship.

NEW YORK, Sept. 14.—Between 1,600 and 1,700 Italian reservists are passengers on board the Fabre Line steamer Sant' Anna, bound from New York for Mediterranean ports and reported afire at sea, according to the local agents of the line, James W. Ellwell & Co., here to-night. The ship also carries a large cargo of merchandise.

The Sant' Anna registers 5,814 tons, and is owned by the Fabre Line. Capt. Pavay is in command.

Greeks and Bulgars Clash.

KAVALA, Greece, Sept. 14.—Reports of a frontier skirmish between Greek and Bulgarian patrols near Famagusta have been officially confirmed, and an investigation ordered.

German aeroplanes, it is said here, are constantly flying over Serbian and Bulgarian territory from Orsova, Hungary, to Adrianople. Each of them is loaded to its full capacity, according to the reports, with supplies for the Turks.

pointed out that the credit of Great Britain and France would be back the bonds given for the loan credit that for generations has been regarded as good as gold. With the Governments of both nations standing back of the bonds, why, it was asked, should there be required additional securities?

Generally, the Commission's proposed plan came as a distinct shock to the financial world. In all the talk that has preceded the Commission's arrival here, and in all the gossip that has followed it, there has been only a whisper, now and then, that there would be an attempt to finance a loan of such mammoth proportion, or, in fact, any loan at all, without offering collateral.

SIR WM. VAN HORNE DEAD.

Great Railwayman Passes Away Hospital in Montreal.

MONTREAL, Sept. 14.—Sir William Van Horne died at ten minutes past 2 o'clock Saturday afternoon.

Sir William, who had been in failing health for some years, was stricken down with an abdominal abscess on August 22. He was rushed in the middle of the night to the Royal Victoria Hospital, where an operation was immediately performed. The patient rallied well after the operation, and bulletins issued regarding his condition reported it as satisfactory. Continued improvement was recorded until Wednesday of the past week, when the patient manifested alarming symptoms.

Sir William's condition grew steadily worse. His temperature rose as his appetite failed. Yesterday morning it was announced that hope had practically been abandoned.

The remains will be interred in Joliet, Illinois, his birthplace. The funeral service will be held at Sir William's late residence in Shebrooke street here on Tuesday, as the body will then be shipped to Joliet.

Would Tax Movie Films.

LONDON, Sept. 14.—German-American film companies are threatening to dismiss their English agents should the latter handle or recommend English films in this country while the export of English French films to the United States is forbidden. England is now taking 20 million feet of film per week from these companies, and an agitation has begun here to tax the half a penny per foot, which would yield an annual revenue of two million pounds.

Seven Men Missing.

BRANDON, Man., Sept. 14.—Seven men, four Galicians and three harvesters from Eastern Canada, whose names are unknown, are believed to have been burned to death in the destruction by fire last night of a barn in which they were sleeping in Alf. Magee's farm, near Brandon. The men were sleeping in the barn, and no trace of them has been found since the fire, which also destroyed ten horses and a team of mules.

Effective.

"The climax to his wooing was very romantic. He proposed to her on the verge of a mountain gorge."

"What did she do?"

"She threw him over."

WALLACE'S

ILLION DOLLAR LOAN

nglo-French Commission Divulges Its Plan in New York.

uge Sum Will Be Borrowed on Straight Government Bonds Without Any Collateral, and It Will Be Spent to the Last Cent in the United States on Wheat, Cotton, Meat, and Munitions of War.

NEW YORK, Sept. 14.—The present plan of the joint Anglo-French financial Commission, it was reported last night, is to borrow \$1,000,000,000 in the United States on straight British and French Government bonds without any collateral whatever.

If this vast sum is obtained, it is said, it is to be spent, to the last penny, in the United States in payment of wheat, cotton, meat, and other commodity shipments, including munitions of war. It will, therefore, in the opinion of financial authorities, be classified as a commercial loan.

Whether the United States' neutrality would be questioned should bankers accept straight Government bonds as their security has been given careful consideration. It was said that the financiers familiar with the plan had every reason to believe that the Washington Administration could not interfere.

The foregoing was the unanimous opinion last night of many of the leaders of prominent bankers from New York and the chief cities of the country who have visited the Commission at its headquarters here during the three days of its stay in this city. As to its correctness, the members of the Commission declined positively to comment. All that the commission cared to publish as authoritative was voiced by Lord Readyngham, its Chairman, who received newspaper men last night for the first time.

The outstanding feature of the situation that overshadowed by its tremendous importance everything else that has influenced the foreign exchange rates since their recent slump began was the reported plan of the commission to establish its hoped-for credit here without offering any collateral whatever. Some of the financiers who called on the Commission with vague or pronounced ideas that Great Britain and France would not only give their notes for whatever sum they would borrow, but would put up a huge collateral, dollar for dollar of the loan, composed of approved American securities, were astounded by the radical proposal that no money should be borrowed absolutely without collateral.

Still other financiers were prepared for the proposal and were not surprised.

These bankers, reflecting the reported views of the Commission, pointed out that the credit of Great Britain and France would be back of the bonds given for the loan—a credit that for generations has been regarded as good as gold. With the governments of both nations standing back of the bonds, why, it was asked, should there be required additional securities?

Generally, the Commission's reputation came as a distinct shock to the financial world. In all the talk that has preceded the Commission's arrival here, and in all the gossip that has followed it, there has been only a whisper, now and then, that there would be an attempt to finance a loan of such mammoth proportions,

HARD FIGHT AHEAD.

Enemy Still Has Superiority in Supplies, Says Lloyd George.

LONDON, Sept. 13.—That the central powers still have an overwhelming superiority in all the material and equipment of war and that the allies to win must put forth all their strength is the statement made by David Lloyd George, Minister of Munitions, in the preface of a book containing his speeches since the outbreak of the war, entitled: "Through Terror to Triumph."

"After 12 months of war," says Mr. Lloyd George, "my conviction is stronger than ever that this country could not have kept out of it without imperiling its security and its honor. We could not have looked on cynically with folded arms while a country we had given our word to protect was being ravaged, trodden on by one of our own co-trustees. If British women and children were being brutally destroyed on the high seas by German submarines, this nation would have insisted on calling the infanticide to a stern reckoning.

"Everything that has happened since the declaration of war has clearly demonstrated that a military system so regardless of good faith, honorable obligations, and the elementary impulses of humanity constitutes a menace to civilization of the most sinister character, and, despite the terrible cost of suppressing it, the well-being of humanity demands that such a system should be challenged and destroyed.

"Nor have the untoward incidents of the war weakened my faith in ultimate victory, always provided that the nations put forth the whole of their strength ere it is too late. Anything less must lead to defeat. The allied countries have an overwhelming preponderance in the raw material that goes to the making of the equipment of armes, whether in men, money, or accessible metal and machinery, but this material has to be mobilized and utilized."

CANNONADE CONTINUES.

Furious Artillery Battles Are Going on on Western Front.

PARIS, Sept. 14.—There appears to be no let up in the bombardment which both sides have conducted on the western front for the past two weeks. Neuville, in the region north of Arras, is the centre about which the most vigorous cannonading has centred in the past 24 hours, but artillery fighting of almost equal violence is reported from various points along the front, north of the Aisne, in Champagne, between the Moselle and the Bois de Mortmire, on the Lorraine front.

The infantry of both sides has seen action also in the fighting in the Neuville sector, where hand grenades were used, at Sapigneul, where another German attack has been repulsed, and to the south of Leintrey, where the French artillery and rifle fire stopped a German assault. Infantry patrols have closed in the region of Roje and before Andechy.

Mine combats are the chief form of conflict between the Somme and the Oise, while in the Argonne the soldiers on both sides are using bombs and hand grenades in their frequent engagements.

German aeroplanes dropped bombs on Compiegne, and French aircraft bombed the aeroplane sheds at Brayelle.

The attempts of the German Crown Prince, beginning a year ago and continued at intervals ever since, with an especially violent resumption of the attack recently, to break

ENEMY HOLDS RAILWAY

Battering Drive Compels Russian Forces to Retire.

Successes of Russia Against Austrians in Galicia Make It Likely That the Germans Will Have to Send Reinforcements There—Southern Teuton Armies Striving to Reach Kovno.

LONDON, Sept. 14.—By one of those battering offensives which, although costly in men and munitions, have invariably been successful, Field Marshal von Hindenburg's army has at last set foot on the Rovno-Petrograd railway between Vilna and Dvinsk. The whole Austro-German forces have been striving to gain this railway since the fall of the Polish fortresses.

The offensive, which began toward the end of last week, was carried on from three directions upon Dvinsk and the railway on either side of the town, while farther south the invaders advanced towards Vilna. The Russians, before superior forces, supplied with the usual mass of artillery, were on Sunday forced back to the lake district, which the railway penetrates, and are now making a stand there.

Simultaneously, the Germans pushed their way eastward toward Sionim and Pinsk, both of which are on roads which join the main railway line, while the Austrians, with whom there are many German units, are fighting hard to reach Rovno, the southern terminus of the line.

With this railway partly in the hands of the Germans, it is probable that the Russians will be compelled to make a farther retirement, although their offensive in Galicia, which continues, might save them by compelling the Germans to send reinforcements to this region.

There is now no doubt of Russian successes in this district, following the Austrian admissions of retirements, which bear out the Russian claims. The Russian positions here are well prepared. The eastern bank of the Sereth, from which the Russians are delivering their counter-attacks, is a veritable fortress, from which the Russians emerge every time their opponents approach, taking heavy toll of them in killed, wounded, and prisoners. According to the Russian accounts, nearly 30,000 prisoners have been taken in the fighting along this river.

As for the rest of the entire front, however, Petrograd, in summing up the situation, asserts the Austrians and Germans have been "dashing from one part of the line to the other

TWO FORTS DESTROYED.

French Mortars Have Shown Efficiency at the Dardanelles.

LONDON, Sept. 14.—An optimistic rumor is again afloat, probably due to the statement recently made by Lord Robert Cecil, Under-Secretary for Foreign Affairs, that the allies are not far from a great success in the Dardanelles. According to the French official report the last five days have been very calm. "In the north zone the Turks on different occasions have opened a violent infantry and artillery fire, but without leaving their trenches. In the south zone there is nothing particular to report outside the efficiency of our trench mortars, which have destroyed two small forts and caused sensible losses to the enemy."

The alleged repulse by the Turkish coast batteries of two hostile destroyers which bombarded the defenders left wing from the Narrows is chronicled in the statement issued yesterday by the Turkish War Office.

Armenian Children Sold.

ROME, Sept. 14.—The Agenzia Nazionale has received a telegram from Bucharest correspondent stating that 800,000 Armenians from Asia Minor are now interned in Turkey. The women, the despatch says, have been placed in Turkish harems and the children sold at auction in Constantinople.

Accidentally Electrocuted.

ST. CATHARINES, Sept. 14.—An Italian laborer named Antonio Monteniero, employed on section 3 of the Welland Ship Canal near Merriton, was electrocuted Saturday afternoon, when he grasped a live wire. Coroner Vanderburgh opened an inquest, which was adjourned until next week.

A WASHINGTON MONUMENT.

It Was Built by Money Raised by a Public Lottery.

One of the greatest American monuments to the memory of George Washington was built by lottery. The lottery plan for raising money, though now under the ban of public opinion and generally considered a reprehensible practice, was looked upon as legitimate and respectable by the most reputable class of citizens a century ago.

That monument which was raised to the memory of George Washington by the sale of lottery tickets and the offer of dazzling prizes is the tall column which dominates very exclusive and aristocratic part of Baltimore and which in fair weather may be seen from a considerable distance. Besides

inted out that the credit of Great Britain and France would be back of bonds given for the loan—a bid that for generations has been regarded as good as gold. With the governments of both nations standing back of the bonds, why, it was asked, should there be required additional securities?

Generally, the Commission's reputation came as a distinct shock to a financial world. In all the talk at has preceded the Commission's rival here, and in all the gossip that has followed it, there has been only a whisper, now and then, that there would be an attempt to finance an of such mammoth proportions, in fact, any loan at all, without offering collateral.

SIR WM. VAN HORNE DEAD.

eat Railwayman Passes Away at Hospital in Montreal.

MONTREAL, Sept. 14.—Sir William Van Horne died at ten minutes after 2 o'clock Saturday afternoon. Sir William, who had been in failing health for some years, was stricken down with an abdominal abscess August 22. He was rushed in the middle of the night to the Royal Victoria Hospital, where an operation was immediately performed. The patient rallied well after the operation, and bulletins issued regarding his condition reported it as satisfactory. Continued improvement was corded until Wednesday of the past week, when the patient manifested alarming symptoms.

Sir William's condition grew steadily worse. His temperature rose and his appetite failed. Yesterday morning it was announced that hope had actually been abandoned. The remains will be interred in Ellet, Illinois, his birthplace. The funeral service will be held at Sir William's late residence in Sherbrooke street here on Tuesday, and his body will then be shipped to Ellet.

Would Tax Movie Films.

LONDON, Sept. 14.—German-American film companies are threatening to dismiss their English agents should the latter handle or recommend English films in this country, while the export of English or French films to the United States is forbidden. England is now taking one million feet of film per week from these companies, and an agitation has begun here to tax them at a penny per foot, which would yield an annual revenue of two million pounds.

Seven Men Missing.

BRANDON, Man., Sept. 14.—Seven men, four Galicians and three harvesters from Eastern Canada, whose names are unknown, are believed to have been burned to death in the destruction by fire last night of the barn in which they were sleeping on Mr. Magee's farm, near Brandon. The men were sleeping in the hayloft, and no trace of them has been found since the fire, which also cremated ten horses and a team of mules.

Effective.

"The climax to his wooing was very mantic. He proposed to her on the edge of a mountain gorge."

"What did she do?"

"She threw him over."

The Proof.

"X is the unknown quantity, isn't it?"

"Try to borrow one and you'll soon find out"—Baltimore American.

fire stopped a German assault. Infantry patrols have closed in the region of Roye and before Andechy.

Mine combats are the chief form of conflict between the Somme and the Oise, while in the Argonne the soldiers on both sides are using bombs and hand grenades in their frequent engagements.

German aeroplanes dropped bombs in Compiegne, and French aircraft bombarded the aeroplane sheds at Brayelle.

The attempts of the German Crown Prince, beginning a year ago and continuing at intervals ever since, with an especially violent resumption of the attack recently, to break through the front line in the Argonne have resulted in constant failure, according to a note appended to yesterday's official communiqué. In these attempts the Crown Prince has lost more than 100,000 men, without making any appreciable gain from a strategic point of view.

ROUMANIAN TROOPS GATHER.

They Are Preparing to Meet An Unexpected Austrian Concentration

AUTHENS, Sept. 14.—It is reported in diplomatic circles here that there has been a heavy mobilization of Roumanian troops, including several regiments of cavalry, to face an unexpected concentration of Austrians, which is directed presumably against Roumania.

Railroad traffic in north-western Roumania is declared to have been suspended in favor of the troop movements. All horses have been requisitioned. The second series of reserves are now with the colors.

It is asserted that the Austro-German explanation is that the concentration is directed toward the suppression of espionage in Transylvania, but that this statement is not taken seriously.

All signs lead to the conclusion that the Balkan conflagration is imminent, but until the very last moment even the most competent in the politics of those States, even Balkan representatives themselves, are uncertain as to the definite attitude of certain countries, especially Bulgaria and Roumania.

AUSTRIA WILL ACQUIESCE.

She Will Probably Agree to Remove Dumba From Washington.

ROME, Sept. 14.—It is learned from a Vatican source that Austria has decided to acquiesce in the American demand for Dr. Dumba's recall. It is believed that no successor will be appointed for some time, but that the charge d'affaires will be entrusted with the Austrian Embassy in Washington.

Germany Next in Line.

WASHINGTON, Sept. 14.—It can be stated upon authority that if the German Government in the final analysis seeks to maintain a policy of which the Arabic note and not the von Bernstorff assurances is truly representative, the American Government will break off diplomatic relations with Germany.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

ments, which bear out the Russian claims. The Russian positions here are well prepared. The eastern bank of the Sereth, from which the Russians are delivering their counter-attacks, is a veritable fortress, from which the Russians emerge every time their opponents approach, taking heavy toll of them in killed, wounded, and prisoners. According to the Russian accounts, nearly 30,000 prisoners have been taken in the fighting along this river.

As for the rest of the entire front, however, Petrograd, in summing up the situation, asserts the Austrians and Germans have been "dashing from one part of the line to the other in an effort to strike a decisive blow."

This latter assertion is significant in that it recalls the consensus of allied military critics after the fall of Novo Georgievsk, the last stronghold of the Russian main line of defence, following the capture of 12 other fortresses since Warsaw. "What will the Germans do next?" was the question predominant in everyone's mind. And the reply of leading military observers, including even some in the Fatherland, who were at a loss to guess at any tangible possibility, was: "They do not know themselves; they will have to feel their way."

But even if the Teutonic allies had their minds upon certain principal objects, such as Riga, Petrograd, Moscow, Odessa, Vilna—the sudden turn of the Russians, reinforced and supported by apparently adequate communications, is bound to result in sweeping changes in the central powers' plans, and optimistic critics here predict the complete frustration of the main program, provided that the Russians will be able to make good their gains of the last few days.

That strip of Galicia which still is in Russian hands, continues to be the scene of most furious fighting, with the Slavs evidently retaining the upper hand as attackers. The Russian victory at Tarnopol several days ago, although contradicted by Berlin, can be no longer doubted, since the official Austrian War Office statement admitted it on Saturday.

A Chariot of 1711.

Something over a couple of centuries ago the principle of the taxicab was known. An advertisement in the London Daily Courant of Jan. 13, 1711 announces that at the sign of the Seven Stars, under the piazza of Covent Garden, a chariot was on view that would travel without horses and measure the miles as it goes. It was capable of turning and reversing and could go uphill as easily as on level ground.

Flags at Half Mast.

In speaking of flags the term "half mast" is sometimes heard, and at other times the term "half staff" is used, yet the explanation is simple. It is that a flag is properly said to be at half staff ashore and at half mast on shipboard, and rightly the terms are never interchangeable.—New York Sun

No Sympathy.

He—Do you like your new doctor? She—No, I detest him. Why, the horrid thing had the effrontery to say there would be nothing the matter with me if I just stopped moping over imaginary ailments.—Richmond Times-Dispatch.

Not Catching.

"Was your husband's a protracted illness, Mrs. Nurich?"

"Well, he suffered a lot, but I don't know as it was catchin'."—Buffalo Express.

Opportunities approach only those who use them.—Emerson.

ington was built by lottery. The lottery plan for raising money, though now under the ban of public opinion and generally considered a reprehensible practice, was looked upon as legitimate and respectable by the most reputable class of citizens a century ago.

That monument which was raised to the memory of George Washington by the sale of lottery tickets and the offer of dazzling prizes is the tall column which dominates a very exclusive and aristocratic part of Baltimore and which in fair weather may be seen from a considerable distance. Besides being one of the show places of Baltimore, it is one of the imposing monuments of the United States. The view from the balcony, which is built close to the top of the shaft, and just below, where stands a figure of Washington, is far sweeping, especially bayward.

The cornerstone of the monument was laid with elaborate ceremonies July 4, 1815, and its crowning feature, the statue of Washington, was set in place in 1820. The Washington monument lottery was authorized by the Maryland legislature Jan. 10, 1810. That act was entitled "An act respecting a memorial or statue to the memory of Washington," and under its provisions the applicants were required to give bond for the proper conduct of the lottery and were required to finish up the affairs of the lottery in five years' time, and a space of ground in Baltimore was allotted for the proposed memorial.—Washington Star.

He Knew.

One day in the lively old time of cowboy activities a timid tenderfoot at Bitter Creek asked tremblingly if that bad man, Bill Busher, was hanging around there yet.

"No," replied the native who was asked. "But he was last week."

"Are you sure?" said the tenderfoot.

"Positive. I had hold of the rope."—Browning's Magazine.

A Better Medium.

"Why are you painting advertisements on my fence?"

"So that you will read them and buy my goods."

"Well, it is possible that I may glance at what you have done, but I do most of my reading in the newspapers, my friend."—Louisville Courier-Journal.

Accidents.

In reality there is no such thing in the world as an "accident." Whatever takes place does so because something else took place before it. The conditions being the same, the "accident" always comes, but it is as much the result of law as are the events not called accidents.—New York American.

No Wonder.

"My wife is a nervous wreck," complained the young husband.

"Serves you right," commented the unsympathetic friend, "for keeping the girl on the anxious bench four years before coming to the point."—Louisville Courier-Journal.

Cause of the Row.

"What was the row in the sideshow this morning, Bill?"

"The two headed man quarreled with himself as to which head should get shaved first"—Philadelphia Ledger.

The Retort Personal.

He—if you get the ballot, aren't you afraid you will neglect the family? She—No; not at all. I wouldn't take that prerogative away from you.—Puck.

The BLACK BOX

THIRD INSTALLMENT

SYNOPSIS.

In her apartment at the Leland Ella, daughter of Lord Ashleigh, is murdered and the Ashleigh diamond necklace stolen. The New York police place the case in the hands of Sanford Quest, known and feared as the master criminologist of the world. He takes Lenora, Ella's maid, to his own apartments and through hypnotism and the use of electro-telepathic appliances discovers her connection with the crime, recovers the diamonds and arrests the murderer, Macdougal, Lenora's husband, though nearly trapped to his death in a tough tenement house while engaged in the work. Lenora becomes one of Quest's assistants. The detective is called in to investigate the theft of the skeleton of an ape, of Lord Ashleigh. Macdougal escapes while on his way to prison. A string of diamonds is mysteriously stolen from Mrs. Rheinholt during a reception.

THE POCKET WIRELESS.

CHAPTER VIII.

Mr. Sanford Quest sat in his favorite chair, his cigar inclined toward the left-hand corner of his mouth, his attention riveted upon a small instrument which he was supporting upon his knee. He glanced across the room to where Lenora was bending over her desk.

"We've done it this time, young woman," he declared triumphantly. "It's all O. K., working like a little peach."

Lenora rose and came toward him. "Is that the pocket wireless?"

He nodded.

"I've had Morrison out at Harlem all the morning to test it," he told her. "I've sent him at least half a dozen messages from this easy chair, and got the replies. How are you getting on with the code?"

"Not so badly for a stupid person," Lenora replied.

Laura, who had been busy with some papers at the farther end of the room, came over and joined them.

"Say, it's a dandy little affair, that, Mr. Quest," she exclaimed. "I had a try with it, a day or so ago. Jim spoke to me from Fifth avenue."

"We've got it tuned to a shade now," Quest declared. "Equipped with this simple little device, you can speak to me from anywhere up to ten or a dozen miles."

Quest rose to his feet and moved restlessly about the room.

"Say, girls," he confessed, "this is the first time in my life I have been in a fix like this. Two cases on hand and nothing doing with either of them. Criminologist, indeed! Whose box is this?"

Quest had paused suddenly in front of an oak sideboard which stood against the wall. Occupying a position upon it of some prominence was a small black box, whose presence there seemed to him unfamiliar. Laura came over to his side and

"I want to ask you for a subscription to our funds."

Quest frowned a little.

"Very well, Miss Quigg, you shall have a donation. I am busy today, but call at the same hour tomorrow and my secretary shall have a check ready for you."

The girl smiled her gratitude.

The professor laid his hand upon her arm as she passed.

"Young lady," he observed, "you seem very much in earnest about your work."

"It is only the people in earnest, sir," she answered, "who can do any good in the world. My work is worth being in earnest about."

"You compel my admiration. My most respectful admiration. May I, too, be permitted?"

He drew out a pocketbook and passed over toward her a little wad of notes.

"It is so kind of you," she murmured. "We never have any hesitation in accepting money. May I know your name?"

"It is not necessary," the professor answered. "You can enter me," he added, as he held open the door for her, "as a friend—or would you prefer a pseudonym?"

"A pseudonym, if you please," she begged. "We have so many who send us sums of money as friends. Anything will do."

The professor glanced around the room.

"What pseudonym shall I adopt?" he ruminated. "Shall I say that an oak sideboard gives you five hundred dollars. Or a Chippendale sofa? Or," he added, his eyes resting for a moment upon the little box, "a black box?"

The two girls from the other side of the table started. Even Quest swung suddenly around. The professor, as though pleased with his fancy, nodded as his fingers played with the lid.

"Yes, that will do very nicely," he decided. "Put me down—'Black Box,' five hundred dollars."

The girl took out her book and began to write. The professor, with a little farewell bow, crossed the room toward Quest. Lenora moved toward the door.

"Let me see you out," she said to the girl pleasantly.

Lenora opened the door. Both girls started. Only a few feet away Craig was standing, his head a little thrust forward. For a moment the quiet self-respect of his manner seemed to have deserted him. He seemed at a loss for words.

"What do you want?" Lenora demanded.

"I was waiting for my master," Craig explained.

"Why not downstairs?" Lenora asked suspiciously. "You did not come

"No necessity," Quest replied. "We've got over little difficulties of that sort. Laura, just tack on the phototeleseme," he added, holding the receiver away for a moment. "One moment, French. There that's right," he added, as Laura, with deft fingers arranged what seemed to be a sensitized mirror to the instrument. "Now, French, hold up the article just in front of the receiver. There, that's right. Hold it steady. I've got the focus of it now. Say, French, where did you say that was found?"

"Just outside the professor's back gate," French grunted. "But you're not kidding me—"

"It's a finger from the professor's skeleton you've got there," Quest interrupted.

Quest hung up the receiver. Then he turned toward his two assistants.

"Another finger from the professor's skeleton," he announced, "has been found just outside his grounds. What do you suppose that means?"

"Craig," Lenora declared confidently.

"Craig on your life," Laura echoed. "Say, Mr. Quest, I've got an idea."

Quest nodded.

"Go right ahead with it."

"Didn't the butler at Mrs. Rheinholt's say that Craig belonged to a servant's club up town? I know the place well. Let me go and see if I can't join and pick up a little information about the man. He must have a night out sometimes. Let's find out what he does. How's that?"

"Capital!" Quest agreed. "Get along, Laura. And you, Lenora," he added, "put on your hat. We'll take a ride towards Mayton avenue."

CHAPTER IX.

The exact spot where the bones of the missing skeleton was discovered, was easily located. It was about twenty yards from a gate which led into the back part of the professor's grounds. Quest wasted very little time before arriving at a decision.

"The discovery of the bones so near the professor's home," he decided, "cannot be coincidence only. We will waste no time out here, Lenora. We will search the grounds. Come on."

It was hard to know which way to turn. Every path was choked with tangled weeds and bushes. They wan-

"The Hut, Professor

"Drop that club," he ordered.

The creature suddenly sprang

The club was waved around his h

"Drop it," Quest repeated fir

"You will sit down in your corner.

will sleep."

The club slipped from the hairy gers. The tense frame, which been already crouched for the spr was suddenly relaxed. The kt trembled.

"Back to that corner," Quest dered, pointing.

Slowly and dejectedly, the ape- crept to where he had been ord and sat there with dull, non-com hending stare. It was a new fo this, a note of which he had felt superman raising the voice of aut ty. Quest touched his forehead found it damp. The strain of tl few seconds had been intolerable.

"I don't think these other anir will hurt," he said. "Let's hav look around the place."

The search took only a few ments. The monkeys ran and jun around them, gibbering as though pleasure. The leopard watched t always with a snarl and an evill in his eye.

They found nothing unusual they came to the distant corner, w a huge piano box lay on its side the opening turned to the wall.

"This is where the brute sleep suppose," Quest remarked. "V turn it around, anyway."

They dragged it a few feet a from the wall, so that the ope faced them. Then Lenora gave a l cry and Quest stood suddenly stil

"The skeleton!" Lenora shri "It's the skeleton!"

It was a skeleton so old that bones had turned a dull gray. Q glanced towards the hands.

"Little fingers both missing," muttered.

"Remember the message?" she claimed. Where the skeleton is, necklace may be also."

Quest nodded shortly.

"We'll search."

They turned over everything in place fruitlessly. There was no of the necklace.

"You get outside, Lenora," Ques reected. "I'll just bring this t

Quest rose to his feet and moved restlessly about the room.

"Say, girls," he confessed, "this is the first time in my life I have been in a fix like this. Two cases on hand and nothing doing with either of them. Criminologist, indeed! Whose box is this?"

Quest had paused suddenly in front of an oak sideboard which stood against the wall. Occupying a position upon it of some prominence was a small black box, whose presence there seemed to him unfamiliar. Laura came over to his side and looked at it also in puzzled fashion.

"Never saw it before in my life," she answered.

Quest grunted.

"H'm! No one else has been in the room, and it hasn't been empty for more than ten minutes," he remarked. "Well, let's see what's inside, anyway."

He lifted off the lid. There was nothing in the interior but a sheet of paper folded up. Quest smoothed it out with his hand. They all leaned over and read the following words, written in an obviously disguised hand:

You have embarked on a new study—anthropology. What characteristic strikes you most forcibly in connection with it? Cunning? The necklace might be where the skeleton is. Why not begin at the beginning?

The note was unsigned, but in the spot where a signature might have been there was a rough pen drawing of two hands, with fingers extended, talon fashion, menacingly, as though poised to strike at some unseen enemy. Quest, after their first moment of stupefaction, whistled softly.

"The hands!" he muttered.

"What hands?" Lenora asked.

"The hands that gripped Mrs. Rheinholdt by the throat," he reminded them. "Don't you remember? Hands without arms?"

There was another brief, almost stupefied silence. Then Laura broke into speech.

"What I want to know is," she demanded, "who brought the thing here?"

"A most daring exploit, anyway," Quest declared. "If we could answer your question, Laura, we could solve the whole riddle. We are up against something, and no mistake."

"The hand which placed that box there," Quest continued slowly, "is capable of even more wonderful things. We must be cautious. Hello!"

The door had opened. The professor stood upon the threshold.

"I trust that I have done right in coming up," he inquired.

"Quite right, professor," Quest assured him. "They know well enough downstairs that I am always at home to you. Come in."

"I am so anxious to learn," the professor continued eagerly, "whether there is any news—of my skeleton."

"Not yet, professor, I am sorry to say," Quest replied. "Come in and shut the door."

"There is a young lady here," he said, "who caught me up upon the landing. She, too, I believe, wishes to see you."

He threw open the door and stood on one side. A young woman came a little hesitatingly into the room. Her hair was plainly brushed back, and she wore the severe dress of the Salvation Army.

"Want to see me, young lady?" Quest asked.

She held out a book.

"My name is Miss Quigg," she said.

Let me see you out, said said to the girl pleasantly.

Lenora opened the door. Both girls started. Only a few feet away Craig was standing, his head a little thrust forward. For a moment the quiet self-respect of his manner seemed to have deserted him. He seemed at a loss for words.

"What do you want?" Lenora demanded.

"I was waiting for my master," Craig explained.

"Why not downstairs?" Lenora asked suspiciously. "You did not come up with him."

"I am driving the professor in his automobile," Craig explained. "It occurred to me that if we were going to be long here I should have time to go and order another tire. It is of no consequence, though. I will go down and wait in the car."

Lenora stood at the top of the stairs and watched him disappear. Then she went thoughtfully back to her work. The professor and Quest were talking at the farther end of the room.

"I was in hopes, in great hopes," the professor admitted, "that you might have heard something. I promised to call at Mrs. Rheinholdt's this afternoon."

Quest shook his head.

"There is nothing to report at present, Mr. Achleigh," he announced.

"Dear me," the professor murmured, "this is very disappointing. Is there no clue, Mr. Quest—no clue at all?"

"Not a ghost of one," Quest acknowledged. "I am as far off solving the mystery of the disappearance of your skeleton and Mrs. Rheinholdt's necklace as I have ever been."

The professor took a courteous leave of them all and departed. Lenora crossed the room to where Quest was seated.

"Mr. Quest," she asked, "do you believe in inspiration?"

"I attribute a large amount of my success," Quest replied, "to my profound belief in it."

"Then let me tell you," Lenora continued, "that I have one, and a very strong one. Do you know that when I went to the door a few minutes ago the professor's servant, Craig, was there, listening?"

"Inspector French has had his men watching Craig ever since the night of the robbery," quietly remarked Quest. "What's that? Answer the telephone, Lenora."

Lenora obeyed.

"It's Inspector French," she announced. "He wants to speak to you."

Quest nodded and held out his hand for the receiver.

"Hello, French!" he exclaimed. "Anything fresh?"

"Nothing much," was the answer. "One of my men, though, who has been up Mayton avenue way, brought in something I found rather interesting this morning. I want you to come round and see it."

"Go right ahead and tell me about it," Quest invited.

"You know we've been shadowing Craig," the inspector continued. "Not much luck up till now. Fellow seems never to leave his master's side. We have had a couple of men up there, though, and one of them brought in a curious-looking object he picked up just outside the back of the professor's grounds."

"What is the thing?" Quest asked.

"Well, I want you to see whether you agree with me," French went on. "If you can't come round, I'll come to you."

In Front of Them Crouched an Unrecognizable Creature.

It was a skeleton so old that the bones had turned a dull gray. Quest glanced towards the hands.

"Little fingers both missing," he muttered.

"Remember the message?" she exclaimed. "Where the skeleton is, the necklace may be also."

Quest nodded shortly.

"We'll search."

They turned over everything in the place fruitlessly. There was no sign of the necklace.

"You get outside, Lenora," Quest directed. "I'll just bring this beast round again and then we'll tackle the professor."

Quest turned towards the creature, which crouched still huddled up in its corner.

"Look at me," he ordered.

The creature obeyed. Once more its frame seemed to grow more virile and natural.

"You need sleep no longer," Quest said. "Wake up and be yourself."

The effect of these words was instantaneous. Almost as he spoke, the creature crouched for a spring. There was wild hatred in its close-set eyes, the snarl of something fiendlike in its constricted mouth. Quest slipped quickly through the door.

"Anyone may have that for a pet!" he remarked grimly. "Come, Lenora, there's a word or two to be said to the professor. There's something here will need a little explanation."

He lit a cigar as they struggled back along the path. Presently they reached the untidy-looking avenue, and a few minutes later arrived at the house.

Quest searched in vain for a bell. They walked round the piazza. There were no signs of any human life. They came back to the front door. Quest tried the handle and found it open. They passed into the hall.

"Hospitable sort of place, anyway," he remarked. "We'll go in and wait, Lenora."

They found their way to the study, which seemed to be the only habitable room. Lenora glanced around at its strange contents with an expression almost of awe.

A small motor car passed the window, driven by Craig. The professor descended. A moment or two later he entered the room. He gazed from Quest to Lenora at first in blank surprise. Then he held out his hands.

"You have good news for me, my friends!" he exclaimed. "I am sure of it. How unfortunate that I was not at home to receive you! Tell me—don't keep me in suspense, if you please—you have discovered my skeleton?"

"We have found the skeleton," Quest announced.

For a single moment the newcomer stood as though turned to stone.

"My skeleton!" he murmured. "Mr. Quest, I knew it. You are the greatest man alive. Now tell me quickly—I want to know everything, but this first of all. Where did you find the skeleton? Who was the thief?"

"We found the skeleton, professor," Quest replied, "within a hundred yards of this house."

The professor's mouth was wide open. He looked like a bewildered child. It was several seconds before he spoke.

"Within a hundred yards of this house? Then it wasn't stolen by one of my rivals?"

"I should say not," Quest admitted.

"Where? exactly did you find it?" the professor insisted.

"I found it in a hut," Quest said, "hidden in a piano box. I found there, also, a creature—a human being, I

"The Hut, Professor! The Hut is on Fire!"

"Drop that club," he ordered. The creature suddenly sprang up. The club was waved around his head. "Drop it," Quest repeated firmly. "You will sit down in your corner. You will sleep."

The club slipped from the hairy fingers. The tense frame, which had been already crouched for the spring, was suddenly relaxed. The knees trembled.

"Back to that corner," Quest ordered, pointing.

Slowly and dejectedly, the ape-man crept to where he had been ordered and sat there with dull, non-comprehending stare. It was a new force, this, a note of which he had felt—the superman raising the voice of authority. Quest touched his forehead and found it damp. The strain of those few seconds had been intolerable.

"I don't think these other animals will hurt," he said. "Let's have a look around the place."

The search took only a few moments. The monkeys ran and jumped around them, gibbering as though with pleasure. The leopard watched them always with a snarl and an evil light in his eye.

They found nothing unusual until they came to the distant corner, where a huge piano box lay on its side with the opening turned to the wall.

"This is where the brute sleeps, I suppose," Quest remarked. "We'll turn it around, anyway."

They dragged it a few feet away from the wall, so that the opening faced them. Then Lenora gave a little cry and Quest stood suddenly still.

"The skeleton!" Lenora shrieked. "It's the skeleton!"

It was a skeleton so old that the bones had turned a dull gray. Quest glanced towards the hands.

"Little fingers both missing," he muttered.

"Remember the message?" she exclaimed. Where the skeleton is, the necklace may be also."

Quest nodded shortly.

"We'll search."

They turned over everything in the place fruitlessly. There was no sign of the necklace.

"You get outside, Lenora," Quest directed. "I'll just bring this beast

must call him—in a state of captivity."

"Hidden in a piano box?" the professor repeated wonderingly. "Why, you mean in Hartoo's sleeping box, then?"

"If Mr. Hartoo is the gentleman who tried to club me, you are right," Quest admitted. "Mr. Ashleigh, before we go any further I must ask you for an explanation as to the presence of that person in your grounds?"

The professor hesitated for a moment. Then he slowly crossed the room, opened the drawer of a small escritoire, and drew out a letter.

"You have heard of Sir William Raysmore, the president of the Royal Society?" he asked.

Quest nodded.

"This letter is from him," the professor continued. "You had better read it."

The criminologist read it aloud. Lenora looked over his shoulder:

To Prof. Edgar Ashleigh, New York.

My Dear Professor: Your communication gratifies and amazes me. I can say no more. It fell to your lot to discover the skeleton of the anthropoid, a marvelous thing, in its way, and needing only its corollary to form the greatest discovery since the dark ages. Now you tell me that in the person of Hartoo, the last of the Inyamo race of South America, you have found that corollary.

You have supplied the missing link. You are in a position to give to the world a definite and logical explanation of the evolution of man. Let me give you one word of warning, professor, before I write you at greater length on the matter. Anthropologists are afflicted more, even than any other race of scientific men, with jealousy. Guard your secret well, lest the honor of this discovery should be stolen from you.

WILLIAM RAYSMORE.

The professor nodded deliberately as Quest finished the letter.

"Now, perhaps you can understand," he said, "why it was necessary to keep Hartoo absolutely hidden. In a month's time my papers will be ready. Then I shall electrify the world. I shall write not a new page but a new volume across the history of science. I shall—"

The door was suddenly thrown open. Craig sprang in, no longer the self-contained, perfect manservant, but with the face of some wild creature. His shout was one almost of agony.

"The hut, professor! The hut is on fire!" he cried.

His appearance on the threshold

He spelled it out to Lenora, who stood by his side:

Have joined Servants' club disguised as your Butler. Craig frequent visitor here ten years ago, comes now occasionally, Thursday evenings most likely time. Shall wait here on chance of seeing him.

"Good girl, that," Quest remarked. "She's a rare sticker, too."

He turned away from the instrument and was crossing the room toward his cigar cabinet. Suddenly he stopped. He looked intently towards the sideboard.

"What is it?" Lenora asked.

He did not answer. She followed the direction of his gaze. Exactly in the same spot as before reposed an

It Was. Mrs. Rheinholdt's Necklace
other but somewhat larger black box, of the same shape and material as the previous one.

"Say, who put that there?" he demanded.

Lenora shook her head.

"I locked the door when we went out," she assured him.

Quest took the box into his hands and removed the lid. It seemed half full of cotton-wool. On the top were a few lines of writing and beneath them the signature of the parted hands. He read the form out slowly:

Drop all investigation. The hands that return these jewels command it.

Quest raised the cotton-wool. Beneath lay Mrs. Rheinholdt's necklace!

(To be continued.)

RUNNING A BLOCKADE.

Rules That Usually Govern This Exciting Wartime Sea Game.

Although their operations are drastic and unpleasant, blockades and blockade runners have always been among the most picturesque and dramatic aspects of a great war.

Blockades can be applied either to an enemy's town or fortress or to a port or series of ports on an enemy's coast. It has, in a naval sense, two effects. It brings pressure to bear on an enemy within their own gates and aims at preventing the import or export of provisions, articles of trade, ammunition or reinforcements. It also makes it unlawful for neutrals to trade with those particular ports.

As a consequence, certain precau-

ONLY SIXTEEN, GIRL VERY SICK

Tells How She Was Made Well by Lydia E. Pinkham's Vegetable Compound.

New Orleans, La.—"I take pleasure in writing these lines to express my gratitude to you. I am only 16 years old and work in a tobacco factory. I have been a very sick girl but I have improved wonderfully since taking Lydia E. Pinkham's Vegetable Compound and am now looking fine and feeling a thousand times better." —Miss AMELIA JAQUILLARD, 3961 Tehoupitoula St., New Orleans, La.

St. Clair, Pa.—"My mother was alarmed because I was troubled with suppression and had pains in my back and side, and severe headaches. I had pimples on my face, my complexion was sallow, my sleep was disturbed, I had nervous spells, was very tired and had no ambition. Lydia E. Pinkham's Vegetable Compound has worked like a charm in my case and has regulated me. I worked in a mill among hundreds of girls and have recommended your medicine to many of them." —Miss ESTELLA MAGUIRE, 110 Thwing St., St. Clair, Pa.

There is nothing that teaches more than experience. Therefore, such letters from girls who have suffered and were restored to health by Lydia E. Pinkham's Vegetable Compound should be a lesson to others. The same remedy is within reach of all.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

FOREIGN DEVILS.

The Answer a Chinese Official Gave a British Consul.

In his book "Home Life In China" Isaac Taylor Headland gives an account of the Chinese superstitions regarding the foreigner, one of which has resulted in their calling him Kuei-tzu, or "devil." A very amusing story, says he, is told of a red haired, red whiskered, blue eyed British consul at Canton who was, as are most of the British officials, of an investigative disposition and was anxious to know why it was that the Chinese call us of the west "foreign devils." Now be it understood that the Chinese idea of a demon is that he is a red haired, red bearded, blue eyed being who quails at nothing that comes in his way. One day when a Chinese official was calling on the consul the latter asked him:

"Why is it that the Chinese call us devils?"

The official at first hesitated, but, being pressed, he finally said, "I do not care to tell you."

"But I should take it as a great favor if you would tell me. I am very anxious to know."

"I cannot tell you," said the official.

"Why not?" asked the consul.

"Because you would be angry if I

It was a skeleton so old that the bones had turned a dull gray. Quest glanced towards the hands.

"Little fingers both missing," he muttered.

"Remember the message?" she exclaimed. Where the skeleton is, the necklace may be also."

Quest nodded shortly.

"We'll search."

They turned over everything in the place of fruitlessly. There was no sign of the necklace.

"You get outside, Lenora," Quest directed. "I'll just bring this beast round again and then we'll tackle the professor."

Quest turned towards the creature, which crouched still huddled up in its corner.

"Look at me," he ordered.

The creature obeyed. Once more its frame seemed to grow more virile and natural.

"You need sleep no longer," Quest said. "Wake up and be yourself."

The effect of these words was instantaneous. Almost as he spoke, the creature crouched for a spring. There was wild hatred in its close-set eyes, the snarl of something fiendlike in its contorted mouth. Quest slipped quickly through the door.

"Anyone may have that for a pet!" he remarked grimly. "Come, Lenora, there's a word or two to be said to the professor. There's something here will need a little explanation."

He lit a cigar as they struggled back along the path. Presently they reached the untidy-looking avenue, and a few minutes later arrived at the house.

Quest searched in vain for a bell. They walked round the piazza. There were no signs of any human life. They came back to the front door. Quest tried the handle and found it open. They passed into the hall.

"Hospitable sort of place, anyway," he remarked. "We'll go in and wait, Lenora."

They found their way to the study, which seemed to be the only habitable room. Lenora glanced around at its strange contents with an expression almost of awe.

A small motor car passed the window, driven by Craig. The professor descended. A moment or two later he entered the room. He gazed from Quest to Lenora at first in blank surprise. Then he held out his hands.

"You have good news for me, my friends!" he exclaimed. "I am sure of it. How unfortunate that I was not at home to receive you! Tell me—don't keep me in suspense, if you please—you have discovered my skeleton?"

"We have found the skeleton," Quest announced.

For a single moment the newcomer stood as though turned to stone.

"My skeleton!" he murmured. "Mr. Quest, I knew it. You are the greatest man alive. Now tell me quickly—I want to know everything, but this first of all. Where did you find the skeleton? Who was the thief?"

"We found the skeleton, professor," Quest replied, "within a hundred yards of this house."

The professor's mouth was wide open. He looked like a bewildered child. It was several seconds before he spoke.

"Within a hundred yards of this house? Then it wasn't stolen by one of my rivals?"

"I should say not," Quest admitted.

"Where? exactly did you find it?" the professor insisted.

"I found it in a hut," Quest said, "hidden in a piano box. I found there, also, a creature—a human being, I

he said, "why it was necessary to keep Hartoo absolutely hidden. In a month's time my papers will be ready. Then I shall electrify the world. I shall write not a new page but a new volume across the history of science. I shall—"

The door was suddenly thrown open. Craig sprang in, no longer the self-contained, perfect man-servant, but with the face of some wild creature. His shout was one almost of agony.

"The hut, professor! The hut is on fire!" he cried.

His appearance on the threshold was like a flash. They heard his flying feet down the hall, and without a moment's hesitation they all followed. The professor led the way down a narrow and concealed path, but when they reached the little clearing in which the hut was situated, they were unable to approach any nearer. The place was a whirlwind of flame. The smell of kerosene was almost overpowering. The wild yell of the leopard rose above the strange, half-human gibbering of the monkeys and the hoarse, bass calling of another voice, at the sound of which Lenora and even Quest shuddered. Then, as they came, breathless, to a standstill, they saw a strange thing. One side of the hut fell in, and almost immediately the leopard with a mighty spring, leaped from the place and ran howling into the undergrowth. The monkeys followed but they came straight for the professor, wringing their hands. They fawned at his feet as though trying to show him their scorched bodies. Then for a single moment they saw the form of the ape-man as he struggled to follow the others. His strength failed him, however. He fell backwards into the burning chasm.

The professor bade them farewell, an hour later, on the steps of the house. He seemed suddenly to have aged.

"You have done your best, Mr. Quest," he said, "but fate has been too strong. Remember this, though. It is quite true that the cunning of Hartoo may have made it possible for him to have stolen the skeleton and to have brought it back to its hiding-place, but it was jealousy—cruel, brutal, foul jealousy which smeared the walls of that hut with kerosene and set light to it. The work of a lifetime, my dreams of scientific immortality, have vanished in those flames."

He turned slowly away from them and re-entered the house. Quest and Lenora made their way down the avenue and entered the automobile which was waiting for them, almost in silence. The latter glanced toward his companion, as they drove off.

"Say, this has been a bit tough for you," he remarked. "I'll have to call somewhere and get you a glass of wine."

She tried to smile but her strength was almost gone. They drove to a restaurant and sat there for some little time. Lenora soon recovered her color. She even had courage to speak of the events of the afternoon when they re-entered the automobile.

"Mr. Quest," Lenora murmured, "who do you suppose burned the hut down?"

"If I don't say Craig, I suppose you will," he remarked. "I wonder whether Laura's had any luck."

They were greeted, as they entered Quest's room, by a familiar little ticking. Quest smiled with pleasure.

"It's the pocket wireless," he declared. "Let me take down the message."

ade runners have always been among the most picturesque and dramatic aspects of a great war.

Blockades can be applied either to an enemy's town or fortress or to a port or series of ports on an enemy's coast. It has, in a naval sense, two effects. It brings pressure to bear on an enemy within their own gates and aims at preventing the import or export of provisions, articles of trade, ammunition or reinforcements. It also makes it unlawful for neutrals to trade with those particular ports.

As a consequence, certain precautions are usually observed. It is, for instance, held that for a valid blockade not only should a state of war exist, but that the blockading party should maintain a force sufficient to prevent access to the blockaded port or, at all events, powerful enough to render the passage of a relief ship extremely hazardous. Further, it is essential that neutral nations should have proper notice of the existence of the blockade either by official notice or by warning given to neutral vessels on their arrival outside the prohibited zone.

Nations differ as to what constitutes an effective blockade. All countries, however, agree that a blockading force may seize any vessel with its cargo trying to trade with a blockaded port and can send it home for condemnation. Even if a vessel succeeds in breaking through a blockade it can be pursued and, if possible, captured.

A vessel may, for the sake of humanity—suppose her crew is starving or she is in danger of sinking—be allowed to enter blockaded port. Mail steamers also if they do not carry contraband, are permitted to go in and out.—Pearson's Weekly.

What Fog Is.

Small particles of water have a tendency to fall slowly in still air, while a very light upward current will be enough to keep them from descending at all in the case of very small particles. It has been shown that the globules of water forming a fog or cloud are each composed of a film of water condensed upon a particle of dust, and the cores are solid instead of gaseous, as the old theory indicated.

Consistency of the Sex.

A bride who is thirty-one if a day will give her age to the marriage license clerk as twenty-six and then criticise the home paper with great severity for its shameless unreliability when it announces that the color scheme of the wedding was lavender instead of heliotrope.—Columbus (O.) Journal.

Her Little Slam.

"I see that a statistician estimates there are 150,000 idiots in the United States."

"Well?"

"I was just wondering who the women are who married the other 149,999."—Detroit Free Press.

I should say sincerity, a deep, great, genuine sincerity, is the first characteristic of all men in any way heroic.—Carlyle.

at nothing that comes in his way. One day when a Chinese official was calling on the consul the latter asked him:

"Why is it that the Chinese call us devils?"

The official at first hesitated, but, being pressed, he finally said, "I do not care to tell you."

"But I should take it as a great favor if you would tell me. I am very anxious to know."

"I cannot tell you," said the official.

"Why not?" asked the consul.
"Because you would be angry if I told you."

"By no means. I would not be so unreasonable as to ask you a question and then be offended because you answered it. On the other hand, I should be greatly obliged to you."

Being thus pressed until he was unable to refuse, the official finally eyed the consul from head to foot and said slowly and reluctantly, "Well, it is because you look like devils."

This natural superstition of the people was taken hold of by the Boxers in 1900 and circulated still more widely by all kinds of placards, both in prose and verse. I have one before me in verse, a part of which, translated, read as follows:

The devils are not human beings like you.
If you doubt what I say
You may see any day
That the eyes of the devils in color are blue.

A Queer Marriage Custom.

In the Loochow Islands there are some curious marriage customs. One consists in the bridegroom going around to all his friends' houses and permitting them to dress him up in any ridiculous style that they fancy. Sometimes the happy man is arrayed in a gayly painted kimono, the sleeves of which are tied up with a string laden with bells, toys and trumpets. A mask is then put on and a red hat, the "rig-out" being completed by an empty kerosene tin, which rattles noisily along as he walks.

Outmatched.

"Did you hear about the row round at Penhecker's house last night?" Mr. Jones asked his wife as they sat at supper.

"No," said the lady, much interested. "What happened?"

"Penhecker tried to thrash his wife, and the police were called just in time to avert a tragedy."

"Oh, the brute! Did they take him to prison?"

"No. They carried him round to the hospital."—London Mail.

Babies in Samoa.

Samoan babies can give points to Europeans apparently. According to A. S. Middleton in "Sailor and Beachcomber," they are much prettier and very intelligent. Moreover:

They can swim at three months old; talk, run and sing at a year old, and if a Samoan had a child that sucked a dummy (presumably a comforter) at six years old and wailed driveling along in its pram at an advanced age, as the children of the wealthy class of England do, they would look upon it as a great curio and smother it for shame on the first starless night.

Carrots—J. W. Walker, L. Evans, W. A. Potter.

Mangoold wurtzels—G. H. Brooks, W. H. Vannest, J. W. Walker.

Table beets—J. W. Walker, L. Hartman, W. A. Potter.

Onions—J. W. Walker, L. Hartman, W. A. Potter.

L. Hartman.
Special by G. H. Richardson.
For best single turnout arivers by lady—Alf. Milligan.
Special pony prize—Albert Pierson.

Now is the time to preserve your eggs. Egg Preserver in all size cans, at WALLACE'S Drug Store Limited.

AUTUMNAL HINTS TO HOUSE-HOLDERS.

How The Dangers of Fire May be Minimized.

The season is fast approaching when cool evenings will demand the starting of fires in our homes. September and October have become known to firemen as the months when chimneys and flues cause the most trouble.

The following suggestions of a practical nature, if faithfully followed, will do much to prevent damage to property and loss of life.

STOVES—Place metal stove-board on the wood floor under the stove, and extending at least twelve inches in front of the ash pit door. Protect all walls and partitions within two feet of any stove with a metal shield, leaving an air-space between the shield and the wall. Leave no kindling or other wood in the oven overnight. Do not hang clothes too near the stove or stovepipes.

PIPES—See that the lengths of stovepipe are fitted together, free from rust holes and parted seams, wired firmly and fitted perfectly into the chimney. Stovepipes passing through partitions, walls, floors, attics and roofs are dangerous at best. Where these must pass through partitions, walls or floor always use a large ventilated double thimble. You should examine the stovepipes in the attic. They may come apart or rust. Fluff and spider webs are likely to gather on and around them, to be set on fire when you least expect it.

CHIMNEYS—Chimneys should be built from the ground up, and never rest on wood supports. The settling of the woodwork will cause cracks in the chimney. Nor should the chimney walls be used to support joists or other woodwork. Soft brick and poor mortar are often responsible for defects in the chimney. Use a good quality of brick and cement mortar. Chimney walls should be at least eight inches thick, the flue of ample size and lined with fire clay or terra cotta. Never stuff up the flue holes with rags or paper, nor cover them with anything but a metal stock. Chimneys should be cleaned frequently.

FURNACES—Protect all woodwork above and around boilers, if within three feet, with a metal shield, also all woodwork near furnace pipes. It is best to live the lengths of pipe together to prevent disjoining. The pipe should fit perfectly into the chimney. Examine the pipe frequently for rust holes or other defects. Keep them free from dust, fluff and spider webs, which are easily ignited.

DEFECTS—Defective stoves, boilers, furnaces and chimneys should be promptly repaired or replaced.

OVERHEATING—Beware of overheating stoves, boilers, furnaces and pipes.

ASHES—These should never be placed in wooden receptacles or bins, on wood floors or against wood partitions, walls, fences, buildings or any other woodwork. Use metal receptacles only, and dump ashes away from all buildings.

CARE—These matters are technical, but very simple and merely call for ordinary care. You cannot afford to be careless, when the lives of your loved ones, and property of yourself and neighbors are at stake. Let "Care and Caution" be the watchword and in this way assist in reducing Canada's enormous fire loss.

You get Douglas Egyptian Liniment at HOOPER'S.

2. Geraldine Allen, S.S. No. 1.

CLASS 33—Drawing (Our School).

1. Mildred Blackadder, S.S. No. 6.
1. Kathleen Smith, S.S. No. 3.
2. Hazel Bongard, S.S. No. 1.
2. Hattie Wood, S.S. No. 3.

CLASS 34—Pen Drawing (Our Farm Home).

1. Eleanor Cooper, S.S. No. 1.
1. Jeanette Smith, S.S. No. 3.

DAVID LLOYD GEORGE SPEAKS VERY PLAINLY

Are we getting all the men we shall want to put into the firing line next year to enable us even to hold our own? Does every man who can help whether by fighting or providing material, understand clearly that ruin awaits remission?

RUSSIANS MUST RE-EQUIP.

"How many people in this country fully apprehend to its full significance the Russian retreat? For over 12 months Russia despite deficiencies in equipment, has absorbed the energies of half the German and four-fifths of the Austrian forces. It is realized that for the time being Russia has made her contribution to the struggle for Europe and freedom, and that we cannot for months to come expect the same active help from the Russian armies we have hitherto received?" Who is to take the Russian place when those Russian armies are re-equipping? Who is to bear the weight which has hitherto fallen on Russian shoulders?

DEPENDS ON BRITAIN.

"France cannot be expected to sustain much heavier burdens than those she now bears with a quiet courage which has astonished the world. Italy is putting her strength into the fight. There is only Britain left. Is Britain prepared to fill up the gap that will be created when Russia retires to the rear? Is she fully prepared to cope with all the possibilities of the next few months in the west, without forgetting the east? Upon the answer will depend the liberties of Europe for many generations."

"A shrewd and sagacious observer told me the other day that in his judgment the course pursued by this country during the next three months would decide the fate of the war."

WHOLE NATION MUST RESPOND.

"If we are not allowed to equip our factories and workshops with adequate labor to supply our army."

ly demonstrated that a military system so regardless of good faith, honorable obligations and the elementary impulses of humanity constitutes a menace to civilization of the most sinister character, and, despite the terrible cost of suppressing it, the well-being of humanity demands that such a system should be challenged and destroyed.

"Nor have the untoward incidents of the war weakened my faith in ultimate victory, always providing that the nations put forth the whole of their strength ere it is too late. Anything less must lead to defeat. The allied countries have an overwhelming preponderance in the raw material that goes to the making of the equipment of armies, whether in men, money, or accessible metal and machinery, but this material has to be mobilized and utilized.

"It would be idle to pretend that the first 12 months of the war have seen this task accomplished satisfactorily. Had the allies realized in time the full strength of their redoubtable and resourceful foes, nay, what is more, had they realized their own strength and resources and taken prompt action to organize them, to-day we would have witnessed the triumphant spectacle of their guns pouring out a stream of shot and shell which would have deluged the German trenches with fire and scorched the German legions back across their frontier.

MUST HAVE WAR MATERIAL.

"With the resources of Great Britain, France and Russia, yes, of the whole industrial world at the disposal of the allies, the central powers still have an overwhelming superiority in all the material and equipment of war. The result of this deplorable fact is exactly what might have been foreseen. The iron heel of Germany has sunk deeper than ever into Belgian and French soil. Poland is entirely German, and Lithuania is rapidly following. Russian fortresses deemed impregnable are falling like sand castles before the ruthless tide of Teutonic invasion.

"When will that tide recede or be stemmed? As soon as the allies are supplied with an abundance of war material."

Mr. Lloyd George says that he is recalling unpleasant facts to stir his countrymen to put forth their strength to amend the situation. There has been a great awakening, he says, and prodigious efforts are being made to equip the armies, but, adds the minister: "Nothing but our best can pull us thru."

He asks: "Are we straining every nerve to make up for lost time?"

Parke's Catsup Flavor both flavors and preserves your pickles. You get it at WALLACE'S Limited, the leading Drug Store, P.S.—The very best

"A shrewd and sagacious observer told me the other day that in his judgment the course pursued by this country during the next three months would decide the fate of the war.

WHOLE NATION MUST RESPOND.

"If we are not allowed to equip our factories and workshops with adequate labor to supply our armies, because we must not transgress regulations applicable to normal conditions; If practices are maintained which restrict the output of essential war material; if the nation hesitates when

the need is clear to take the necessary steps to call forth its manhood to defend its honor and existence; if vital decisions are postponed until too late; if we neglect to make ready for all probable eventualities; if, in fact, we give ground for the accusation that we are sloughing into disaster as if we were walking along the ordinary paths of peace without an enemy in sight, then I can see no hope.

"But if we sacrificed all we own and all we like for our native land, and if our preparations are marked by grim resolution and prompt readiness in every sphere then victory is assured."

E. J. POLLARD—One year's subscription to Napanee Express for best loaf home-made bread—Miss Mellow.

MR. ROWELL'S SPEECHES.

Sept. 6th, labor day, with Sir John Hendrie, Lt. Gov. of Ontario at Sturgeon Falls. Subject “Working men, and the War.”

Sept. 7th, at Renfrew, Ontario, with Sir George Foster.

Sept. 9th, at Toronto, with Sir George Foster at annual meeting of Life Underwriters' Association of Canada.

SIR GEORGE AND MR. ROWELL.

(At Life Underwriters' Association.)

Sir George—“I confess to you that every time I see the open bar and see the young soldiers of this country coming in and going out, every time I pass the open bar and see the unemployed, who perchance have got a day's employment, making a bee-line, I confess that my soul cries out for the closed bar in Canada.”

Mr. Rowell—“If we have in our midst to-day an institution which is demanding sums of money for its perpetuation and is giving no return in value but is impairing the earning capacity of the men who patronize it, there is only one patriotic duty for every patriotic citizen; that to the extent of his ability this curse will be wiped out—the curse of the open bar. Let us have the courage in this supreme crisis to rise to the height necessary in order that this thing should be done and done promptly.”

B. C. CONVENTION.

The largest, most representative and most enthusiastic temperance convention ever held in British Columbia has recently closed its sessions. The convention passed a resolution asking that the Government should submit to the people the question of the abolition of the liquor traffic in British Columbia by a bill similar to that carried in Alberta on the 31st of July.

Sir Richard McBride, Prime Minister of British Columbia, has issued the following statement. “It has been decided, after careful consideration, to submit the whole question (of the liquor traffic) to a plebiscite of the electorate. The date of the taking of the plebiscite will be announced as soon as it is decided what shall form a basis of the referendum. I may say it is intended to direct the course of the legislation in this regard according to the general result of the vote to be taken.”

The net result, therefore, of the last two or three weeks in British Columbia has been a remarkable advance in the movement against the liquor traffic. Up to the present time British Columbia has not even had a local option law but now it looks as if the public are going to have a voice as to whether or not the whole liquor traffic in the Province is to be wiped out as the people of Alberta have decided to wipe it out there and as Saskatchewan did with the bars this summer and as Manitoba is going to vote on this winter.

WALLACE'S good Spices make good pickles because they are always fresh and of the highest quality.

THE DOMINION OF CANADA.

That's the Official Title of England's North American Daughter.

The official title of Canada is the Dominion of Canada. It embraces eleven provinces—viz., Alberta, British Columbia, Manitoba, New Brunswick, Nova Scotia, Ontario, Prince Edward Island, Quebec, Saskatchewan, Northwest Territories and Yukon Territory.

The government is federal, centered at Ottawa, the capital of the Dominion, while each of the provinces, like our states, has its local legislature and capital. The head of the federal government is a governor general, appointed by the king of Great Britain and holding office for five years. Each province has a lieutenant governor, appointed by the federal government for a term of five years.

The federal or Dominion parliament consists of a senate, with eighty-seven members, nominated by the governor general and appointed for life by the king, and a house of commons of 221 members, elected by the people of the several provinces for a term of five years, the right of suffrage being subject to a property qualification.

The provincial legislatures are elected by the people of each province. Each province has its own courts of local jurisdiction, and there is a federal supreme court consisting of a chief justice and five associate judges.—Philadelphia Press.

"I Am Going to Find Out."

"I have been reading and hearing about Columbia Records so much and so often—that I am going to decide right now for myself whether they are better recorded and have a better and more lasting surface than any I have ever heard.

"I have been told time and again that they will fit my machine, and that there are hundreds of Columbia Records at the standard price of 85 cents. I am going to prove it.

"Within a very short distance of where I am right now there is a Columbia dealer. And I am going to see him. I own a talking machine, and if there's anything new or better in the way of records, I want it."

Now you've said it—do it.

A FOOL AND HIS MONEY

By
**GEORGE BARR
M'CUTCHEON,**
Author of "Graustark,"
"Truxton King," Etc.

Copyright, 1915, by George Barr
McCUTCHEON.

Late in the afternoon I stole far up into the eastern tower to visit my adorable friend Rosemary. We played house together on the nursery floor, and I soon got over my feeling of de-

We Played House Together on the Nursery Floor.

pression. But even in play I was made to realize that I was not the master of the house. She ruled me with the utmost despotism, but I didn't mind. She permitted me to sip honey from that cunning place in her little neck and managed to call me Unko. My heart grew warm and soft again under the spell of her.

The countess watched us at play from her seat by the window. She was strangely still and pensive. I had the feeling that she was watching me all the time and that there was a shadow of anxiety in her lovely eyes. She smiled at our pranks, and yet there was something sad in the smile.

I was young again with Rosemary and full of glee. She took me out of myself. I forgot the three Tituses and with them many of my woes. Here was a cure for the blues—this gay little kiddie of the unspeakable Tar-

thought of it myself."

"You have so much to think of, poor man! And now will you be good enough to have Hawkes order the man to row me across the—"

"I am very sorry, Mrs. Titus," said I firmly, "but I fear I must declare myself. I cannot permit you to go into the town today."

She was thunderstruck. "Are you in earnest?" she cried after searching my face rather intently for a moment.

"Unhappily, yea. Will you let me explain—"

"The idea!" she exclaimed as she drew herself to her full height and withered me with a look of surpassing scorn. "Am I to regard myself as a prisoner, Mr. Smart?"

"Oh, I beg of you, Mrs. Titus"— I began miserably.

"Please answer my question."

Her tone cut me like the lash of a whip. My choler rose.

"I do not choose to regard myself as a jailer. My only object in opposing this"—

"I have never known anything so absurd." Two bright red spots appeared in her cheeks. "Your attitude is most extraordinary. However, I shall go to the city this morning, Mr. Smart. Pray give me the credit of having sense enough to— Ah, Colingraft!"

The two sons approached from the breakfast room, where they had been enjoying a 10 o'clock chop. Colingraft, noting his mother's attire, accelerated his speed and was soon beside us.

"Going out, mother?" he inquired, flicking the ash from his cigarette.

"If Mr. Smart will be good enough to withdraw his opposition," she said icily.

He gave me a sharp look. "What's up?"

"Mrs. Titus doesn't seem to realize the risk she runs in"—

"Risk? Do you suppose, Mr. Smart, I would jeopardize my daughter's?"

"What's up?" repeated Colingraft insistently.

"Mr. Smart calmly informs me that I am not to go into the city."

"I don't see that Mr. Smart has anything to say about it," said her son coldly. "If he—" He paused, glaring.

I looked him squarely in the eye. If he had possessed the acumen of a pollywog he would have seen that my Dutch was up.

"One moment, Mr. Titus," I said, setting my jaw. "I have this to say about it. You are guests in my house. We are jointly interested in the effort to protect the Countess Tarnowsky. I consider it to be the height of imprudence for any member of your family to venture into the city now or at any time during her stay in this castle. I happen to know that Tarnowsky is having me watched for some purpose or other. I don't think he suspects that the countess is here, but I greatly fear that he believes I am interested in her cause. He suspects me. You have heard of our recent encounter. He knows my position pretty well by this time. Mrs. Titus says that the man Dillingham assures her there is no danger. Well, I can only say that Dillingham is a fool, and I don't purpose having my own safety threatened by—"

"Your safety?" exclaimed he. "I like that! What have you got to be afraid of?"

"You seem to forget that I am harboring a fugitive from justice," I said flatly.

Mrs. Titus gasped. "How dare you!"

"The Countess Tarnowsky is wanted by the authorities for kidnaping, and

"FRUIT-A-TIVES" THE MARVELLOUS FRUIT MEDICINE

Has Relieved More Cases of
Stomach, Liver, Blood,
Kidney and Skin Trouble
Than Any Other Medicine

THOUSANDS OWE THEIR GOOD HEALTH TO IT

Made From The Juices of Apples,
Oranges, Figs and Prunes Combined
With Tonics and Antiseptics.

"Fruit-a-tives" means health. In years to come, people will look back to the discovery of 'Fruit-a-tives' and wonder how they ever managed to get along without these wonderful tablets, made from fruit juices.

"FRUIT-A-TIVES" is excellent for Indigestion, Dyspepsia and Sour Stomach. 'Fruit-a-tives' is the only certain remedy that will correct chronic Constipation and Liver trouble.

'Fruit-a-tives' is the greatest Kidney Remedy in the world and many people have testified to its value in severe cases of Rheumatism, Sciatica, Lumbar, Pain in the Back, Impure Blood, Headaches, Neuralgia, Pimples, Bloches and other Skin Troubles.

"FRUIT-A-TIVES" has been one of the great successes of the century and the sales are enormous, both in Canada and the United States. 50c. a box, 6 for \$2.50, trial size 25c. At all dealers, or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

"Colingraft, please take me to my room," murmured the mother. "I—I feel faint. Send for Aline. Ask Mr. Bangs to come to me at once."

I bowed stiffly. "I am sorry, Mrs. Titus, to have been so harsh, so as service"—

She held up both hands. "I never was so spoken to in all my life, Mr. Smart. I shall not forget it to my dying day."

She walked away from me; her pretty head held high and her chin suspiciously quiver. Colingraft hastened after her, but not without giving me a stare in which rage and wonder struggled for the mastery.

I ran my hand over my moist brow.

"Gee!" said Jasper Junior. "You've corked her all right, all right." He followed me into the study, and I couldn't get rid of him for hours

CHAPTER XXI.

I Have a Tilt With Colingraft.

ATER in the forenoon the countess, with a queer little smile on her lips, told me that her mother considered me the most wonderful, the most forceful character she had ever encountered. I brightened up at that.

But Colingraft was not yet through with me. He sought me out just before luncheon. I was in the courtyard.

with considerable abruptness and precision; and he landed on his back.

I experienced a sensation of unbounded joy. Up to that moment I had wondered whether I could do it with my left hand.

I looked at Jasper junior. He was staring at me in utter bewilderment.

"Good Lord, you—you've knocked him down!"

"I didn't think I could do it," said tinazly.

He sprang to his brother's side and assisted him to a sitting posture.

"Right to the jaw," shouted Jasper with a strange enthusiasm.

"Left," I corrected him.

Colingraft gazed about him in a stupid, vacant fashion for a moment, and then allowed his glazed eyes to rest upon me. He sat rather limply, thought.

"Are you hurt, Colly?" cried Jasper junior.

A sickly grin, more of surprise than shame, stole over Colingraft's face. He put his hand to his jaw, then to the back of his head.

"By Jove!" he murmured. "I didn't think he had it in him. Let me get up!"

Jasper junior was discreet. "Bette let well enough alone, old!"

"I intend to," said Colingraft as he struggled to his feet.

For a moment he faced me uncertainly.

"I'm sorry, Mr. Titus," said I calmly

"You—you are a wonder!" fell from his lips. "I'm not a coward, Mr. Smart. I've boxed a good deal in my time, but by Jove, I never had a jolt like that!"

He turned abruptly and left us. We followed him slowly toward the steps. At the bottom he stopped and faced me again.

"You're a better man than I thought," he said. "If you'll bury the hatchet so will I. I take back what I said to you not because I'm afraid of you, but because I respect you. What say Will you shake hands?"

The surly, arrogant expression was gone from his face. In its place was a puzzled, somewhat inquiring look.

"No hard feeling on my part," I cried gladly. We shook hands. Jasper junior slapped me on the back. "It's most distressing, atavistic habit I'm getting into, knocking people down without rime or reason."

"I daresay you had reason," muttered Colingraft. "I got what was coming to me." An eager light crept into

The countess watched us at play from her seat by the window. She was strangely still and pensive. I had the feeling that she was watching me all the time and that there was a shadow of anxiety in her lovely eyes. She smiled at our pranks, and yet there was something sad in the smile.

I was young again with Rosemary and full of glee. She took me out of myself. I forgot the three Tituses and with them many of my woes. Here was a cure for the blues—this gay little kiddie of the unspeakable Tarrowsy!

I lay awake for hours that night, but when I finally went to sleep—and heaven knows I needed it—it was with the soporific resolution to put my house rigidly in order the very next day. The Titus family (omitting the countess and Rosemary) was to be favored with an ultimatum from which there could be no appeal. John Bellamy Smart had decided—with Morpheus smoothing out the wrinkles of perplexity—that he would be master in his own house.

My high resolve flattened itself out a little after the sound sleep I had, and I make no doubt I should have wavered sadly in my purpose had not a crisis arisen to shape my courage for me in a rather emphatic way.

Shortly after breakfast Mrs. Titus came downstairs very smartly gowned for the street. She announced that she was going into the town for an hour or two and asked me to have one of the Schmicks ferry her across the river. There was a famous antique shop there—memory of other days—and she wanted to browse awhile in search of brasses and bronzes.

I looked at her aghast. I recognized the crisis, but for a moment was unable to marshal my powers of resistance. Noting my consternation, she calmly assured me that there wouldn't be the least danger of detection, as she was going to be heavily veiled and very cautious.

"My dear Mrs. Titus," I murmured in my dismay, "it isn't to be considered. I am sure you won't persist in this when I tell you that Tarrowsy's agents are sure to see you and"—

She laughed. "Tarrowsy's agents! Why should they be here?"

"They seem to be everywhere."

"I can assure you there is none within fifty miles of Schloss Rothhoefen. Our men are in the city. Four of them preceded me. This morning I had Mr. Bangs telephone to the hotel where the chief operative is staying—in the guise of an American tourist, and he does it very cleverly for an Englishman too—and he assures me that there is absolutely no danger. Even Mr. Bangs is satisfied."

"I am forced to say that I am by no means satisfied that it is a safe or wise thing to do, Mrs. Titus," I said, with more firmness than I thought I possessed.

She raised her delicate eyebrows in a most exasperating, well bred, admonitory way.

"I am quite sure, Mr. Smart, that Dillingham is a perfectly trustworthy detective, and"—

"But why take the slightest risk?"

"It is necessary for me to see Dillingham, that is the long and short of it," she said coldly. "One can't discuss things over a telephone, you know. Mr. Bangs understands. And, by the way, Mr. Smart, I have taken the liberty of calling up the central office of the telephone company to ask if they can run an extension wire to my dressing room. I hope you do not mind."

"Not in the least. I should have

known my position pretty well by this time. Mrs. Titus says that the man Dillingham assures her there is no danger. Well, I can only say that Dillingham is a fool, and I don't purpose having my own safety threatened by"—

"Your safety?" exclaimed he. "I like that! What have you got to be afraid of?"

"You seem to forget that I am harboring a fugitive from justice," I said flatly.

Mrs. Titus gasped. "How dare you!"

"The Countess Tarrowsy is wanted by the authorities for kidnapping, and I think you know the facts quite as well as I do," I went on harshly. "God knows I am doing my best to protect her. I am risking more than you seem to appreciate. If she is found here my position isn't likely to be an enviable one. I am not thinking solely of myself, believe me, but after all I contend that I have a right to assert myself in a crisis that may affect me vitally. I trust you will see my position and act accordingly—with consideration if nothing else."

Mrs. Titus did not take her eyes off mine while I was speaking. There was an expression of utter amazement in them. No one had ever opposed her before in just this way. I gathered she didn't know what to make of it.

"I fear you exaggerate the extent of your peril, Mr. Smart," she said dryly. "Of course I have no desire to put you in jeopardy, but it seems to me"—

"Leaving me out of the case altogether, don't you think it is a bit unfair to the countess?" I asked in some heat. "She doesn't want to go to jail."

"Jail!" she cried angrily.

"That's no way to speak about—" began Colingraft furiously.

I broke in rashly. "If you please, Mr. Titus, be good enough to keep your temper. I have no desire to appear harsh and arbitrary, but I can see that it is necessary to speak plainly. There isn't anything in the world I will not do to help you and the countess in this unfortunate business."

Mrs. Titus. I hope you believe me when I say as much. I am her friend. I want to be yours if you will let me. But I reserve the right to say what shall be and what shall not be done as long as you are under my roof. Just a moment, Mr. Titus! I think we are quite agreed that your sister is to depart from here on the 14th of the month. I am to be her escort, so to speak, for a considerable distance in company with Mr. Bangs. Well, it must be clearly understood that not one of you is to show his or her face outside these walls until after that journey is over. That's plain speaking, isn't it?"

"I shall go where I please, and I'll go to the town today"—roared Colingraft, getting no further for the reason that his mother, seeing that I was desperately in earnest, gave vent to a little cry of alarm and clutched her big son by the shoulder. She begged him to listen to reason.

"Reason!" he gasped.

"If you—or any of you—put a foot outside these walls," I declared, "you will not be allowed to re-enter. That's flat!"

"By cricky!" fell in fervent admiration from the lips of Jasper junior. I glanced at his beaming, astonished face. He positively was grinning. "Good for you! You're a wonder, Mr. Smart! By cricky! And you're dead right! We're darn fools!"

"Jasper!" gasped Mrs. Titus.

"Good for you, Jasper!" I cried warmly and took the hand he professed.

couldn't get rid of him for hours

CHAPTER XXI.

I Have a Tilt With Colingraft.

LATER in the forenoon the countess, with a queer little smile on her lips, told me that her mother considered me the most wonderful, the most forceful character she had ever encountered. I brightened up at that.

But Colingraft was not yet through with me. He sought me out just before luncheon. I was in the courtyard, listening patiently to Jasper junior's theories and suggestions concerning the restoration of the entire facade of the castle and what he'd do if he were in my place. Strange to say, I was considerably entertained; he was not at all offensive. On the contrary, he offered his ideas in a pleasantly ingenuous way, always supplementing them with some such salve as "Don't you think so, Mr. Smart?" or "I'm sure you have thought of it yourself," or "Isn't that your idea too?" or "You've done wonders with the joint old man."

Colingraft came directly up to where we were standing.

"See here, Mr. Smart," he began austere, "I've got something to say to you, and I'm not the sort to put it off. I appreciate what you've done for Altne and all that sort of thing, but your manner today has been intolerable, and we've got to come to an understanding."

I eyed him closely. "I suppose you're about to suggest that one or the other of us must evacuate—get out, so to speak," I said.

"Don't talk rubbish. You've got my mother bawling her eyes out upstairs and wishing she were dead. You've got to come off this high horse of yours. You've got to apologize to her, and quick at that. Understand?"

"Nothing will give me greater joy than to offer her my most abject apology, Mr. Smart, unless it would be her unqualified forgiveness."

"You'll have to withdraw everything you said."

"I'll withdraw everything except my ultimatum in respect to her putting a foot outside these walls. That still stands."

"I beg to differ with you."

"You may beg till you're black in the face," said I coolly.

He swallowed hard. His face twitched, and his hands were clinched.

"You are pretty much of a mucker, Mr. Smart," he said between his teeth. "I'm sorry my sister has fallen into your hands." The worst of it is she seems satisfied with everything you do. Good Lord, what she can see in you is beyond comprehension! Protection! Why, you couldn't protect her from the assault of a chicken!"

"Are you trying to insult me, Mr. Titus?"

"You couldn't resent it if I were. There never was an author with enough moral backbone to—"

"Wait! You are her brother. I don't want to have trouble with you. But if you keep on in this strain, Mr. Titus, I shall be compelled to thrash you soundly."

He fairly gasped. "Th-thrash me!" he choked out. Then he advanced.

Much to his surprise—and, strangely enough, not to my own—I failed to retreat. Instead I extended my left fist

I Extended My Left Fist, and He Landed on His Back.

his handsome eyes. "By Jove, we can get in some corking work with the gloves while I'm here. I box quite a bit at home, and I miss it traveling about like this. What say to a half hour or so every day? I have the gloves in one of my trunks. I'm getting horribly seedy. I need stirring up."

"Charmed, I'm sure," I said, assuming an enthusiasm I did not feel. "Pu on the gloves with this strapping skillful boxer? Not I! I was firm; resolved to stop while my record was good. In a scientific clash with the gloves he would soon find out what miserable duffer I was."

"And Jappy, here, is no slouch. He's as shifty as the dickens."

"The shiftier the better," said I with great aplomb. Jasper junior stuck out his chest modestly and said, "Oh, pif fe, Colly." But just the same I hadn't the least doubt in my mind that Jasper could "put it all over me." It was a rather sickening admission, though strictly private.

We made our way to my study where I mildly suggested that we refrain from mentioning our little encounter to Mrs. Titus or the countess. I thought Colingraft was especially pleased with the idea. We swore secrecy.

"I've always been regarded as peaceful, harmless grub," I explained still somewhat bewildered by the feat I had performed and considerably shaken by the fear that I was degenerating into a positive ruffian. "You will believe me, I hope, when I declare that I was merely acting in self defense when I—"

He actually laughed. "Don't apologize." He could not resist the impulse to blurt out once more, "By Jove, I didn't think you could do it!"

"With my left hand, too," I said wistfully. Catching myself up, I hastily changed the subject.

A little later on as Colingraft left the room, slyly feeling of his jaw, Jasper junior whispered to me excitedly: "You've got him eating out of your hand, old top."

Things were coming to a pretty pass said I to myself when I was all alone. It certainly is a pretty pass when on knocks down the ex-husband and the brother of the woman he loves an quite without the least suspicion of a inherited pugnacity.

I had a little note from the countess that afternoon, ceremoniously delivered

th considerable abruptness and precision, and he landed on his back. I experienced a sensation of unbalance. Up to that moment I had wondered whether I could do it with my hand.

I looked at Jasper junior. He was staring at me in utter bewilderment. "Good Lord, you—you've knocked me down!"

"I didn't think I could do it," said I zily.

He sprang to his brother's side and assisted him to a sitting posture.

"Right to the jaw," shouted Jasper, in a strange enthusiasm.

"Left," I corrected him.

Colingraft gazed about him in a stupefied, vacant fashion for a moment, and then allowed his glazed eyes to rest on me. He sat rather limply, I ought.

"Are you hurt, Colly?" cried Jasper zior.

A sickly grin, more of surprise than pain, stole over Colingraft's face. He put his hand to his jaw, then to the back of his head.

"By Jove!" he murmured. "I—I don't think he had it in him. Let me t up!"

Jasper junior was discreet. "Better well enough alone, old"—

"I intend to," said Colingraft as he struggled to his feet.

For a moment he faced me unctiously.

"I'm sorry, Mr. Titus," said I calmly. "You—you are a wonder!" fell from his lips.

"I'm not a coward, Mr. Smart. I've boxed a good deal in my time, but,

Jove, I never had a jolt like that!"

He turned abruptly and left us. We followed him slowly toward the steps, the bottom being stopped and faced again.

"You're a better man than I thought," said. "If you'll bury the hatchet, will I. I take back what I said to you not because I'm afraid of you, but cause I respect you. What say? Ill you shake hands?"

The surly, arrogant expression was gone from his face. In its place was a zizzled, somewhat inquiring look.

"No hard feeling on my part," I cried adably. We shook hands. Jasper junior slapped me on the back. "It's a most distressing, atavistic habit I'm getting into, knocking people down without rime or reason."

"I daresay you had reason," mutter- Colingraft. "I got what was com- z to me." An eager light crept into

ed by Helene Marie Louise Antoinette. It read as follows:

You did Colingraft a very good turn when you laid him low this morning. He is tiresomely interested in his prowess as a boxer or a boxer, or whatever it is in athletic parlance. He has been like a lamb all afternoon, and he really can't get over the way you whacked him. (Is whack the word?) At first he was as much as could be about it, but I think he really felt relieved when I told him I had seen the whole affair from a window in my hall. You see, it gave him a chance to explain how you got in the whack, and I have been obliged to listen to intermittent lectures on the manly art of self defense all afternoon, first from him, then from Jappy. I have a headache and no means of defense. He admits that he deserved it, but I am not surprised. Colly is a sporting chap. He hasn't mean drop of blood in his body. You have made a friend of him. So please don't feel that I hold a grudge against you for what you did. The funny part of it all is that mamma quite agrees with him. She says he deserved it! Mamma is wonderful, really, when it comes to a pinch. She has given up all thought of "putting a foot outside the castle." Can you have luncheon with us tomorrow? Would it be too much trouble if we were to have it in the loggia? I am just mad to get out of doors if only for an hour or two in that walled in spot. Mr. Poopendyke has been perfectly lovely. He came up this morning to tell me that you have not sneezed at all and there isn't the remotest chance now that you will have a cold. It seems he was afraid you might. You must have a very rugged constitution. Britton told Blake that most men would have died from exposure if they had been put in your place. How good you are to me.

ALINE T.
P. S.—I may come down to see you this evening.

* * * * *

I shall skip over the rather uninteresting events of the next two or three days. Nothing of consequence happened unless you are willing to consider important two perfectly blissful nights of sleep on my part; also I had the pleasure of taking the countess "out walking" in my courtyard, to use a colloquialism, once in the warm, sweet sunshine, again 'neath the glow of a radiant moon. She had not been outside the castle walls literally in more than five weeks, and the color leaped back into her cheeks with a rush that delighted me. I may mention in passing that I paid particular attention to her suggestion concerning my dilapidated, gone to seed garden, although I had been bored to extinction by Jasper junior when he undertook to enlighten me horticulturally. She agreed to come forth every day and assist me in building the poor thing up, propping it, so to speak.

As for Mrs. Titus, that really engaging lady made life so easy for me that I wondered why I had ever been apprehensive. She was quite wonderful when "it came to a pinch." I began to understand a good many things about her, chief among them being her unvoiced theories on matrimony. While she did not actually commit herself, I had no difficulty in ascertaining that, from her point of view, marriages are not made in heaven and that a properly arranged divorce is a great deal less terrestrial than it is commonly supposed to be. She believed in matrimony as a trial and divorce as a reward, or something to that effect.

My opinion seemed to carry considerable weight with her. For a day or two after our somewhat sanguinary encounter she was prone to start, even to jump slightly, when I addressed myself to her with unintentional directness. She soon got over that, however.

We were discussing Aline's unfortunate venture into the state of matrimony, and I, feeling temporarily august and superior, managed to say the

"You look seedy, sir," he said, with concern in his voice. "A cold setting in perhaps, sir?"

I tried the brandy, but not because I thought I was taking a cold. Some- how it warmed me up. There is virtue in good spirits.

The countess was abroad very early the next morning. I discovered her in the courtyard, giving directions to Max and Rudolph, who were doing some spading in the garden. She looked very bright and fresh and enticing in the light of an early moon, and I was not only pleased, but astonished, having been led to believe all my life that a woman, no matter how pretty she may be, appears at her worst when the day is young.

I joined her at once. She gave me a gay, accusing smile.

"What have you been saying to mother?" she demanded as she shook hands with me. "I thought you were to be trusted."

I flushed uncomfortably. "I'm sorry, countess. I—I didn't know it was a secret."

She looked at me somewhat quizzically for a moment; then she laughed softly. "It is a secret."

"I hope I haven't got you into bad odor with your"—

"Oh, dear me, no! I'm not in the least worried over what mother may think. I shall do as I please, so there's the end of it."

Extended My Left Fist, and He Landed on His Back.

handsome eyes. "By Jove, we can't do some corking work with the ves while I'm here. I box quite a bit at home, and I miss it traveling out like this. What say to a half hour or so every day? I have the ves in one of my trunks. I'm getting horribly seedy. I need stirring."

"Charmed, I'm sure," I said, assuming an enthusiasm I did not feel. Put the gloves with this strapping, ill-fated boxer? Not I! I was firmly resolved to stop while my record was good. In a scientific clash with the ves he would soon find out what a scurvy duffer I was.

"And Jappy, here, is no slouch. He's shifty as the dickens."

"The shiftness better," said I with aplomb. Jasper junior stuck out his chest modestly and said, "Oh, pif-Colly."

But just the same I hadn't the least doubt in my mind that Jasper could "put it all over me." It was rather sickening admission, though strictly private.

We made our way to my study, where I mildly suggested that we refrain from mentioning our little encounter to Mrs. Titus or the countess. thought Collingraft was especially pleased with the idea. We swore secrecy.

"I've always been regarded as a aceful, harmless grub," I explained, still somewhat bewildered by thefeat had performed and considerably taken by the fear that I was degenerating into a positive ruffian. "You'll believe me, I hope, when I declare that I was merely acting in self defense when I"—

I actually laughed. "Don't apologize." He could not resist the impulse to blurt out once more, "By Jove, I don't think you could do it." "With my left hand, too," I said wondrously. Catching myself up, I hastily changed the subject.

A little later on as Collingraft left the room, still feeling of his jaw, Jasper junior whispered to me excitedly, "You've got him eating out of your old top."

Things were coming to a pretty pass, and I to myself when I was all alone, certainly is a pretty pass when one locks down the ex-husband and the other of the woman he loves and does it without the least suspicion of an hereditary pugnacity.

had a little note from the countess this afternoon, ceremoniously delivered

posed to be. She believed in matrimony as a trial and divorce as a reward, or something to that effect.

My opinion seemed to carry considerable weight with her. For a day or two after our somewhat sanguinary encounter she was prone to start, even to jump slightly, when I addressed myself to her with unintentional directness. She soon got over that, however.

We were discussing Aline's unfortunate venture into the state of matrimony, and I, feeling temporarily august and superior, managed to say the wrong thing and in doing so put myself in a position from which I could not recede without loss of dignity. If my memory serves me correctly I remarked with some asperity that marriages of that kind never turned out well for any one except the bridegroom.

She looked at me coldly. "I am afraid Mr. Smart, that you have been putting some very bad notions into my daughter's head," she said.

"Bad notions?" I murmured.

"She has developed certain pronounced and rather extraordinary views concerning the nobility as the result of your—ah—argument. I may say."

"I'm very sorry. I know one or two exceedingly nice noblemen, and I've no doubt there are a great many more. She must have misunderstood me. I wasn't running down the nobility, Mrs. Titus. I was merely questioning the advisability of elevating it in the way we Americans sometimes do."

"You did not put it so adroitly in discussing the practice with Aline," she said quickly. "Granted that her own marriage was a mistake, a dreadful mistake, it does not follow that all international matches are failures. I would just as soon be unhappily married to a duke as to a dry goods merchant. Mr. Smart."

"But not at the same price, Mrs. Titus," I remarked.

She smiled. "A husband is dear at any price."

"I shouldn't put it just that way," I protested. "A good American husband is a necessity, not a luxury."

"Well, to go back to what I started to say, Aline is very bitter about matrimony as viewed from my point of view. I am sorry to say I attribute her attitude to your excellent counsel ing."

"You flatter me. I was under the impression she took her lesson of Tarrowsy."

"Granted. But Tarrowsy was unfit Why tar all of them with the same stick? There are good noblemen, you'll admit."

"But they don't need rehabilitation."

"Aline, I fear, will never risk another experiment. It's rather calamitous, isn't it? When one stops to consider her youth, beauty and all the happiness there may be!"

"I beg your pardon, Mrs. Titus, but I think your fears are groundless."

"What do you mean?"

"The countess will marry again. I am not betraying a secret, because she has intimated as much to my secretary as well as to me. I take it that as soon as this unhappy affair is settled she will be free to reveal the true state of her feelings toward"— I stopped, somewhat dismayed by my garrulous turn.

"Toward whom?" she fairly snapped. "I don't know," I replied truthfully and, I fear, lugubriously.

"Good heavens!" she cried, starting up from the bench on which we were sitting in the loggia. There was a queer expression in her eyes. "Hasn't

Smart. There is absolutely nothing in what you say."

"A former sweetheart antedating her marriage," I suggested hopelessly.

"She has no sweetheart. Of that I am positive," said she with conviction.

"She must have had an army of admirers. They were legion after her marriage. I may be pardoned for reminding you."

She started. "Has she never mentioned Lord Amberdale to you?" she asked.

"Amberdale?" I repeated, with a queer sinking of the heart. "No, Mrs. Titus. An Englishman?"

She was mistress of herself once more. In a very degage manner she informed me that his lordship, a most attractive and honorable young Englishman, had been one of Aline's warmest friends at the time of the divorce proceedings. But of course there was nothing in that! They had been good friends for years, nothing more, and he was a perfect dear.

But she couldn't fool me. I could see that there was something working at the back of her mind, but whether she was distressed or gratified I was not by way of knowing.

"I've never heard her mention Lord Amberdale," said L

Her eyes narrowed slightly. Had I but known, the mere fact that the countess had not spoken of his lordship provided her experienced mother with an excellent reason for believing that there was something between them. She abruptly brought the conversation to a close and left me, saying that she was off for her beauty nap.

CHAPTER XXII.

The Duel.

ALONE, I soon became a prey to certain disquieting thoughts. Summed up they resolved themselves into a condition of certainty which admitted of but one aspect—the charming countess was in love with Amberdale. And the shocking part of it all was that she was in love with him prior to her separation from Tarrowsy! I felt a cold perspiration start out all over my body as this condition forced itself upon me. He was the man. He had been the man from the beginning. My heart was like lead for the rest of the day, and very curiously for a leaden thing it was subject to pain.

Just before dinner Britton, after inspecting me out of the corner of his eye for some time, advised me to try a little brandy.

"What have you been saying to mother?" she demanded as she shook hands with me. "I thought you were to be trusted."

I flushed uncomfortably. "I'm sorry, countess. I—I didn't know it was a secret."

She looked at me somewhat quizzically for a moment; then she laughed softly. "It is a secret."

"I hope I haven't got you into bad odor with your"—

"Oh, dear me, no! I'm not in the least worried over what mother may think. I shall do as I please, so there's the end of it."

I swallowed something that seemed to be sticking in my throat. "Then it is true that you are going to marry?"

"Quite," she said succinctly.

I was silent for a moment. "Well, I'm—I'm glad to know it in time," I said rather more gruffly than was necessary.

She smiled too merrily I thought. "You must not tell any one else about it however."

"I can promise that," I said, a sullen rage in my soul. "Devils could not drag it out of me. Rest easy."

It occurred to me afterward that she laughed rather jerkily, you might say

uneasily. At any rate, she turned away and began speaking to Max.

"Have you had your breakfast?" I asked stupidly.

"No."

"Neither have I. Will you join me?"

"Isn't it getting to be a habit?"

"Breakfast and you?"

"Breakfast and me."

"I confess, my dear countess, that I like you for breakfast," I said gallantly.

"That is a real tribute," she said demurely and took her place beside me. Together we crossed the courtyard.

(To be Continued.)

A Regular Excuse.

"Does your husband carry much life insurance?"

"I don't know the exact amount, but it's just enough so that whenever I want a new gown or hat he always manages to have a premium to meet!"

Making the Little Farm Pay

By C. C. BOWSFIELD

THE FALL ARMY WORM.

Working Its Way Northward—How to Deal With the Pest.

The department of agriculture has warned the farmers to be prepared to meet the attack of the fall army worm, which is coming east and north from Texas.

When they first appear the worms are very small and feed beneath matted grass, etc., but they grow rapidly and suddenly migrate in myriads to the corn or sorghum fields. If the ground beneath the corn rows is grassy the worms will probably originate there and feed there until partly grown before attacking the corn. There is danger, therefore, that before the farmer is aware of their presence he will find his corn stripped to bare stalks and his alfalfa to bare stems.

Where a close examination of a corn-field shows the presence of the fall army worm actually attacking the corn the department recommends dusting them with powdered arsenate of lead, using three to five pounds per acre, mixed with two or three times its weight of flour.

This precaution is, of course, out of the question on forage crops or on corn afterward to be used as fodder on account of the danger of poisoning stock. In such cases 100 pounds of wheat may be mixed with a couple of pounds either of paris green or powdered arsenate of lead, preferably the former, and the whole mass worked into a stiff dough by the use of three to four gallons of molasses and the juice of half a dozen oranges or lemons added thereto. If this is sown broadcast on the ground where the worms are at work they will feed upon it and be killed. This worm, it has been found, will come to the poisoned bait from distances of from five to ten inches.

In alfalfa fields the immediate cutting and curing of the alfalfa is advisable as soon as the infestation has been discovered. This will not only save the hay crop, but will cut off the food of the fall army worm and check thereby the development of another generation, which may be many times more destructive than the first. As soon as the hay has been removed from the field the ground should be rolled with a heavy roller or brush

"Do with our outer garments what you will," we say, "but don't expect us to adopt antebellum underwear, because we won't consider it!"

Picture those chemises, of thoroughly "durable" material, trimmed with zigzag cotton braiding or the even more horrible cross stitch in colored embroidery cotton!

Think of the long sleeved, ample night robes, with their band collars, buttoned in the front with one button, and their solid embroidery trimming!

Remember the series of petticoats, beginning with a short, scalloped flannel one and continuing outward in layers of starched cotton, and then bless anew those filmy but practical, becoming and altogether comfortable garments which are hidden by the gowns of 1915.

Let us discuss first the wisps of chiffon cloth and chiffon displayed in all seriousness as underwear by the lingerie shops this spring, because they are so exquisite, extravagant and ridiculous.

One set is called "dawn mists" and is worthy of its name. Of filmy rose color, the nightgown, envelope chemise and princess slip are all trimmed with

selves, there are women after all for whom linen remains the material par excellence for underclothes.

The combination underwaist and drawers shown in the illustration is made of finest handkerchief linen with inserts of filmy fillet lace with edgings of val. The waist and drawers are attached together by beading through which ribbon is run. Ribbon quite broad, about an inch, is run through the openwork of the lace on waist and drawers.

Featherstitching and hand run tucks form the only decoration of some of the new French "dessous." Many gowns and chemises have no ornamentation at all except large buttonholes in an empire line through which are drawn inch wide pink ribbons. Filet lace and Russian lace are substantial in wearing qualities and look ephemeral.

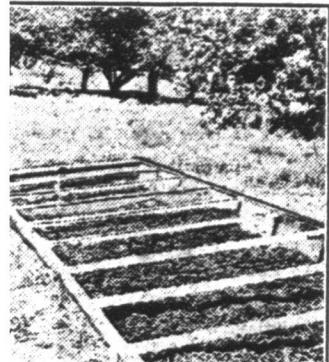

The favorite envelope chemise, which has been adopted with so great an enthusiasm, is procurable now in different priced qualities of handkerchief linen, as well as in the humbler batiste, in both the mercerized and unmercerized varieties.

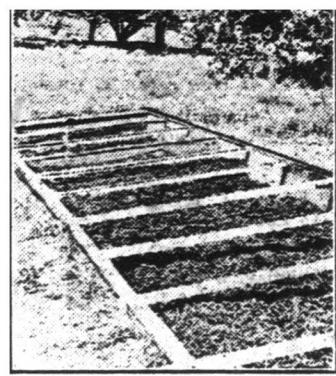

FLORAL CENTERPIECES.

Poetry and Beauty Lie Even In the More Commonplace Flowers.

To hark back to unusual floral centerpieces, have you ever thought what can be done with tulips in the springtime or even now when they are to be had? If you haven't, try massing them in a flat bowl of sand instead of in high glass vases of water, and then collect smaller vases or glasses that harmonize with your bowl, stick a single tulip in each one and set them around your table among lighted candles.

Tulips are stately flowers, and there is something regal in their coloring and the fling of their brilliant heads. Choose the variegated ones for your table and when the candles are alight

COLD FRAME FOR NORTHERN LATITUDES.

supplied with stable manure a fertilizer containing plenty of phosphoric acid and potash increases yields and insures uniform quality. Use 250 to 400 pounds per acre of this fertilizer, drilling it in on each side of the tube through which the beans run. It is not safe to drill fertilizer with the beans, for it is likely to injure the seed.

In northern latitudes use a hotbed or cold frame to make the start and also plant seed in the open ground for succession. Early in May cover the surface of a cold frame with inverted sods cut in squares of about four inches. In each of these plant two or three beans. From the start water frequently and admit plenty of air. When the soil outdoors has become thoroughly warm transplant in open ground. The sods are lifted with a pade after watering. Care must be taken not to break the soil or disturb the roots. The lima should be planted in very rich soil with a well balanced fertilizer. Wood ashes are excellent. Ien manure and wood ashes can be used as to give good results. Work out of the fertilizer in the soil with the harrow, the balance in the hills or furrows.

The two varieties will thrive with simple methods of planting. When rowing the pole lima make a furrow three or four inches deep, scatter in it fertilizers and mix these with the soil, level and firm well; then over it make a mark one or two inches deep and in his press the beans, eye down, one or two inches apart. Put about half an inch of soil over them and firm well. Set posts over the row and fasten six oot wire netting to them. To this the vines are trained as they grow, but are cut off when they reach the top. judicious pruning is necessary to make them bear well and produce large pods. f poles are easily obtained I have no objection to using them, except that he vines require more attention than when trained on trellises. People have used outside rows of corn for a support and also sunflowers, but for the main crop wire netting is most satisfactory.

A considerable quantity of green string beans can be put up by the arm family in a simple canning outfit. The bean is most valuable for canning purposes when the tiny seed has just started to form. Unlike peas, it is the tender pod which is valuable or canning. It is the aim of expert growers to get a uniform, tender, sappy growth of beans, and hence the plant food used should be carefully balanced. Beans must be picked while they are tender and young, before they become stringy. There is comparatively little labor in canning, and prices are on a profitable basis.

has been found, will come to the poisoned bait from distances of from five to ten inches.

In alfalfa fields the immediate cutting and curing of the alfalfa is advisable as soon as the infestation has been discovered. This will not only save the hay crop, but will cut off the food of the fall army worm and check thereby the development of another generation, which may be many times more destructive than the first. As soon as the hay has been removed from the field the ground should be rolled with a heavy roller or brush dragged, or the poison bait can be used.

The habit of the moths of descending an inch or two into the ground in order to pass into the pupal state is of great importance in their control. It has been estimated that shallow cultivation will destroy from 50 to 90 per cent of the insects at this time, the efficiency of the measure depending upon the thoroughness with which the work is done. In alfalfa the use of the spiked tooth harrow or the alfalfa cultivator is best unless it is known that disking is not injurious to plants.

Cultivation of the ground between the rows of corn has been found to destroy nearly all of these pupae, thereby preventing the development of another generation. Ordinarily there are from three to four or even five generations of the fall army worm in the course of a year, the damage done increasing as each successive generation spreads.

When fields are threatened with invasion, but have not as yet become actually infested, a deep furrow should be plowed out around the entire circumference of the field. Into this furrow the advancing worms will fall. They may then be killed by dragging a heavy log through the furrow, or in sections where irrigation is possible the furrow may be filled with water and a small quantity of kerosene sprinkled over the surface. This will kill the worms almost instantly.

The fall army worm when a full grown caterpillar is about one and a half inches in length. The body is striped on a ground varying in color from a pale, yellowish brown to black, more or less streaked and intermixed with dull yellow. On each side there is a broad yellow undulating line more or less strongly mottled with red. When very young, however, the caterpillar is nearly black. The worm will attack almost any form of vegetation that is encountered and owes its name to the fact that, except in the extreme south, it does not appear until very much later in the season than the common army worm, which it closely resembles.

Mother Love.

"Mother machree," he said. "I have worn and torn your heart is for love of us all."

"Jerome avick," I said to that, "I've worn and torn the hearts of mothers were before me and will be again. God help their children if they're not." —From "Mother Machree," by James B. Connolly, in Scribner's.

Height of Annoyance.

"I'm mad at my wife. To anger her I shall flirt with some other woman."

"If you want to make her absolutely furious ask some other woman to sew on a button for you."

Children Cry FOR FLETCHER'S CASTORIA

ers or starched cotton, and then dress anew those filmy but practical, becoming and altogether comfortable garments which are hidden by the gowns of 1915.

Let us discuss first the wisps of chiffon cloth and chiffon displayed in all seriousness as underwear by the lingerie shops this spring, because they are so exquisite, extravagant and ridiculous.

One set is called "dawn mists" and is worthy of its name. Of filmy rose color, the nightgown, envelope chemise and princess slip are all trimmed with nothing but wide hem of their own material, through which are run the thinnest of white satin ribbons.

Other sets, in empire form, are decked with groups of tiny chiffon roses. Some are inset with finest valenciennes.

A bit less ethereal and really very wearable and alluring are the crea-

UNDERWAIST AND DRAWERS.

tions of chiffon cloth, much like indestructible voile, which are found in lovely one colored sets, or in white grounds with groups of Dresden flowers in pastel shades, or in the more startling Poiret bouquets.

Some models are just touched with filet lace, for this variety is enjoying a great vogue just now, and appears also combined with crepe de chine, handkerchief linen and batiste.

Crepe de chine as a material for underclothes is thoroughly established. The charming, almost untrimmed models in the heavy quality, which were seen all last winter, are giving way to the lighter weights, lace trimmed or ribbon run, which are more appropriate to the warm weather.

Untrimmed garments in this weight are also procurable for those who have adopted the simple line in lingerie, which the pussy willow taffeta, requiring no ornamentation beyond its beautiful self, first taught us to like. Advocates of crepe de chine for summer wear—and there are many—extol its noncrushable qualities.

It is well to remember in buying silken undergarments that a flesh color or pink is preferable to white, as washing only makes it prettier, while the white is almost sure to become yellow after laundering.

Lovely as the silken materials are, practical as they have shown them-

pieces, have you ever thought what can be done with tulips in the springtime or even now when they are to be had? If you haven't, try massing them in a flat bowl of sand instead of in high glass vases of water, and then collect smaller vases or glasses that harmonize with your bowl, stick a single tulip in each one and set them around your table among lighted candles.

Tulips are stately flowers, and there is something regal in their coloring and the fling of their brilliant heads. Choose the variegated ones for your table and when the candles are ablaze see if the effect is not one of what Mr. Kipling would call "truly oriental splendor."

Yellow has long been a favorite color scheme for the table, and yet there are ways and ways of using yellow. Cut glass has been voted a soulless thing, cold and unimaginative, and yet one woman who used her ever active brain to plan feasts for the eye fairly took away her guests' breath by a recent spectacular arrangement of a crystal laden and yellow decorated dinner table.

Yellow shades softened the flare of lights to a mellow glow. Yellow roses banked in a crystal basket formed the centerpiece, and more yellow roses nodded from cut glass vases, set here and there and everywhere. Yellow tied favors and place cards, each with a touch of yellow, gleamed among the rows of glasses at each table. And broad bands of yellow satin ribbon broke the even whiteness of the cloth, their reflection in the glistening glass adding to the colorfulness of it all.

Did it ever occur to you, you hostesses seeking after novelty, that a combination of purple and yellow flowers on a table is as charming as it is rare? Purple and gold are used for kings' robes, and yet in the tiniest gardens in season grow daffodils and violets, pansies both purple and yellow, heliotrope, dwarf sunflowers and sometimes yellow roses, while along the country roadsides may be had for the mere joy of picking them buttercups and dandelions.

And, after all, it is cleverness in making use of the everyday things that often counts for most. One of the prettiest shower bouquets imaginable for a bride was made up in a little Maine village of that feathery white wild carrot, known more poetically as queen's lace.

Cedar Chest.

Get or make a large pine box of desired size. Hinge on the cover neatly, and if there are any cracks or holes putty them up; paint the outside of the chest; get some oil of cedar of the druggist and paint the inside with it, using plenty of oil. This will soak into the pine and retain the odor for years.

ASTHMA COUGHS

WHOOPING COUGH SPASMODIC CROUP
BRONCHITIS CATARRH COLDS

Vapo-Resolene 14

Est. 1879

A simple, safe and effective treatment avoiding drugs. Used with success for 35 years.

The air carrying the antiseptic vapor, inhaled with every breath, makes breathing easy, soothes the bronchial tubes, and stops the cough, assuring restful nights.

Resolene is invaluable to mothers with young children and a boon to sufferers from Asthma.

A GREAT PRIESTHOOD DIVINELY APPOINTED

A Higher Priesthood Than the Aaronic Order.

**God's New Order of Priesthood—
Each Member Called and Chosen**
—The Great High Priest—His Sacrifice of Himself—The Under Priests of This Order—Membership Limited in Number.

Albany, N. Y., Aug. 29.—Pastor Russell delivered a masterful discourse here today. His text was, "No man taketh this honor to himself but he that is called of God, as was Aaron." — Hebrews 5:4.

The Epistle to the Hebrews, the Pastor pointed out, shows that God had ordained a higher priesthood than the Aaronic Order of the Mosaic arrangement; and that upon our Lord Jesus was conferred the great honor of being the Head of the New Order, the Church being under priests. While on earth Christ could not be a priest; for Aaron's family constituted a Divinely ordained priesthood, in which none others could presume to take part without God's invitation. To this day the Jews respect the Aaronic priesthood; and since they cannot know who belongs to Aaron's family, they have no priest and no such service as a priest could render.

The thought of another priesthood astonished the Jews of St. Paul's day. They could not understand how any priesthood could be higher than the Aaronic Order. Nevertheless, through the Prophet David, God had long before declared our Lord's Priesthood: "Thou art a priest forever after the Order of Melchizedek." (Psalm 110:4.) Elsewhere we read that Melchizedec was "the priest of the Most High God"—"a priest upon his throne." (Genesis 14:17-21; Hebrews 7:1-4.) God has conferred a very great honor upon our Lord, has appointed Him to be the world's Redeemer, High Priest and King, through whom will come all blessings designed for humanity.

"Worthy to Loose the Seals."

The speaker then demonstrated that before our Lord could be thus highly exalted, He must be thoroughly tested and proved worthy to be the great Antitype of Melchizedec. Amongst other Scriptures examined was our Lord's own statement, as recorded in Revelation 5, where the Divine Plan for human deliverance from sin and death is pictured. God is shown as seated upon His Throne, holding in His hand a Scroll, written within and without, and sealed with seven seals. This represents the Plan which God had purposed before the foundation of the world, and which was known only to Himself. Throughout Heaven and earth the proclamation was made: "Who is worthy to loose the seals and to look therein?" Nobody came forward. But God foreknew that our Lord Jesus would prove worthy to open the Scroll.

Finally an angel said to St. John,

THE MARKETS

CHICAGO, Sept. 13.—Fear that wet weather in the northwest might prevent timely deliveries on contracts made the wheat market today average higher. The close was unsettled at a net advance of $\frac{1}{2}$ c to $\frac{3}{4}$ c, with September at $95\frac{1}{4}$ c and December $95\frac{3}{4}$ c. Corn finished $\frac{1}{2}$ c to $\frac{3}{4}$ c down, oats off a shade to $\frac{1}{2}$ c, and provisions varying from $2\frac{1}{2}$ c decline to a rise of $1\frac{1}{2}$ c.

WINNIPEG GRAIN MARKET.

WINNIPEG, Sept. 13.—The covering by shorts of last week was resumed today, the market opening strong. October touched $90\frac{1}{2}$ c, Dec. $90\frac{3}{4}$ c and May $96\frac{1}{2}$ c. The unseasonable weather, which is delaying movement of grain, caused considerable apprehension.

Oats opened unchanged and advanced steadily. Barley showed a material advance on September and October. Flax opened unchanged for October, and $1\frac{1}{2}$ c on December.

In inspections 1254 cars, as against 2916 a year ago. In sight today 350 cars.

Wheat futures closed $1\frac{1}{4}$ c to $1\frac{3}{4}$ c up, cash wheat $2\frac{1}{4}$ c up, oats unchanged to $\frac{1}{2}$ c up, and flax $3\frac{1}{2}$ c to $5\frac{1}{2}$ c up.

MONTREAL GRAIN MARKET.

MONTREAL, Sept. 13.—There continues to be a fairly good demand from foreign buyers for Manitoba spring wheat, and as the prices bid for most grades for nearby shipment were in line, a moderate business was done, but exporters stated that the bids for future shipment were 2c out of line. Coarse grains quiet. Flour steady. Millifeed firm. Butter firm. Cheese quiet. Eggs firm.

CATTLE MARKETS

CITY PEOPLE AND FARMING.

The fatal mistake of many city people taking to farm life is a rush of enthusiasm before properly planning the future life. They give up good jobs, scant of means, and perhaps they over-invest, depending upon their new efforts and resources to meet expenses that should have been previously provided for.

There are many thousands of city wage earners who could vastly better their conditions by having their families on small farms of ten, fifteen or twenty acres properly prepared for production by soil improvement before actual settlement. — Farm and Fireside.

SAVE THE WATER.

Keep the Soil Supplied With Humus and Mulch the Surface.

By saving the water from the early rains crops will not suffer as much later in the summer if drought occurs. Usually more water is lost from the soil by evaporation—that is, drying out from the surface, than crops use.

There are two chief ways of helping to prevent this—namely, by keeping the soil well supplied with organic matter, or humus, and by maintaining a soil mulch over the surface. This soil mulch or layer of loose dry soil forms a blanket, preventing the soil water from reaching the surface where evaporation is so rapid in hot or windy weather.

Every gardener should start water saving at once. If the newly plowed land is disked thoroughly the same day it is turned over there is less chance of the furrows drying out badly before the land is planted. Newly spaded land should be raked over the same day the soil is turned.

After planting the use of a weeder breaks up the surface and kills many weeds. The cultivator ought to be started as soon as the rows can be seen and used often enough to keep the surface fine, loose and dry.

Every rain or shower packs the surface soil, and unless broken up evaporation is very rapid from this com-

Making the Little Farm Pay

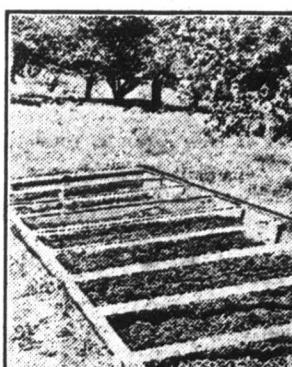

By C. C. BOWSFIELD

One of the surest and best making features on any farm is a bean crop. This product is in constant demand at good prices and be sold in the general market or in cans for private customers.

Two or three acres of common beans is not too large a crop for ordinary farm, and if an acre or half an acre of pole lima beans added the results will be worth wading.

While the bean crop seldom cautions in planting and fertilizing. The ground must be well the outset. The early planting will pay in harvesting a crop of will not do for beans. It is best a light soil which is tilled or else enough for drainage. Moisture richness are required, but the should not be allowed to become s.

In getting ready for a bean crop good plan is to plow under a pie clover sod in the fall, putting on a large amount of barnyard manure, and harrow the ground in the spring. As the crop is not an early one must have rapid growth, it pays supply plenty of plant food. A fertilizer containing 2 per cent of nitrogen, 1 per cent of phosphoric acid and 1 cent of potash gives good results. land where clover is grown and

recurred in Revelation 5, where the Divine Plan for human deliverance from sin and death is pictured. God is shown as seated upon His Throne, holding in His hand a Scroll, written within and without, and sealed with seven seals. This represents the Plan which God had purposed before the foundation of the world, and which was known only to Himself. Throughout Heaven and earth the proclamation was made: "Who is worthy to loose the seals and to look therein?" Nobody came forward. But God foreknew that our Lord Jesus would prove worthy to open the Scroll.

Finally an angel said to St. John, "The Lion of the tribe of Judah hath prevailed." The Lion was the Strong One of Judah, of which tribe God had prophetically declared that Messiah should come—of David's lineage. The Strong One could do the work; but all mankind were imperfect, incompetent. Jesus was sent into the world perfect—in the image of God. Heretofore no one had proved worthy; for the conditions which God had attached were very stringent. He was looking for One competent to be a Prime Minister, as it were, to represent Him fully and to be associated with Him forever. For so high a position He had purposed that this One should be made partaker of the Divine nature—immortality. Our Lord must demonstrate His loyalty to the fullest degree before He could be counted worthy of this high exaltation.—1 Timothy 6: 16; John 5:26, 27.

According to the Law our Lord could do nothing in His Priestly Office until He was of age. When His thirtieth anniversary came, He presented Himself in consecration to the Father. At Jordan He began to carry out the Divine Plan presented in the Scroll, and mentioned by the Prophets of Israel. There the Father opened the eyes of His understanding. There He became the slain Lamb. For three and a half years God proved the One Who was to become the antitypical Melchisedec, the Priest upon His Throne, partaker of the Divine nature. Surely He was faithful, even unto the death of the Cross. Now He is highly exalted, at the Father's right hand. (Philippians 2:8-11.) The Lord Jesus Christ is Jehovah's great Prime Minister.

Further Contents of the Scroll.

The Pastor showed that the Scroll further revealed that God had purposed calling out from the world a Church of under priests, to share in the sufferings of Christ and the glory to follow. All the work of the Gospel Age has been with a view to perfecting this company, members of the great antitypical Priest and King. Whoever consecrates himself to God, is begotten of the Holy Spirit and walks faithfully the narrow way of self-sacrifice will become a joint-heir with Christ, a fully accepted member of the great Melchisedec Order of Priesthood. As soon as the last members are completed, the 144,000 will stand with the Lamb upon Mount Zion, ready for the Kingdom work.—Revelation 14:1-5.

How to Mend Kid Gloves.

The head of a glove department in an Ohio store tells as follows how to mend kid gloves: "To mend kid gloves very satisfactorily try this method: With small sharp scissors remove all ragged edges. Buttonhole firmly both edges to be mended with cotton thread (never use silk, as it cuts), using a very fine needle; then bring both these edges together and button hole. A glove mended in this way cannot pull out or rip and will stand the hardest kind of wear thereafter."—Woman's Home Companion.

vance on September and October. Flax opened unchanged for October, and 1½c on December.

Inspections 1254 cars, as against 2916 a year ago. In sight today 350 cars.

Wheat futures closed 1½c to 1¾c up, cash wheat 2¼c up, oats unchanged to 3c up, and flax 3¾c to 5½c up.

MONTREAL GRAIN MARKET.

MONTREAL, Sept. 13.—There continues to be a fairly good demand from foreign buyers for Manitoba spring wheat, and, as the prices bid for most grades for nearby shipment were in line, a moderate business was done, but exporters stated that the bids for future shipment were 2c out of line. Coarse grains quiet. Flour steady. Millfeed firm. Butter firm. Cheese quiet. Eggs firm.

CATTLE MARKETS

UNION STOCK YARDS.

TORONTO, Sept. 13.—Receipts of live stock at the Union Yards were 3,255 cattle, 473 hogs, 820 sheep, and 108 calves.

Butchers' Cattle.

Choice butchers' cattle, \$7.50 to \$7.75; good at \$6.85 to \$7.25; medium, \$6.25 to \$6.75; common, \$5.75 to \$6.25; light steers and heifers, \$5.25 to \$5.75; choice cows, \$6.50 to \$6.75; good cows, \$5.75 to \$6.25; medium cows, \$5.50 to \$5.75; common cows, \$4.50 to \$5.50; canners and cutters, \$3.50 to \$4.50; bulls at \$3.50 to \$6.50.

Stockers and Feeders.

Choice feeders, 300 lbs., \$6.90 to \$7.10; good feeders, \$5.50 to 900 lbs., at \$6.50 to \$7.50; good stockers, 700 to 800 lbs., at \$6.40 to \$6.50; stockers, 600 to 700 lbs., at \$6.25 to \$6.50; common stocker steers at \$5 to \$5.50; stock heifers at \$5 to \$5.30.

Milkers and Springers.

Choice milkers and springers at \$85 to \$105; good cows at \$75 to \$82; common cows at \$45 to \$65.

Veal Calves.

Choice veal calves, \$10 to \$10.50; good, \$9 to \$9.50; medium, \$7 to \$8; common, \$5.50 to \$6.50; grass, \$4.50 to \$5.50.

Sheep and Lambs.

Light sheep, \$8.75 to \$9.50; heavy sheep at \$8.50 to \$9.50; yearlings at \$6.50 to \$7.50; lambs, \$5 to \$8.50.

Hogs.

Selects, weighed off cars, \$9.50 to \$9.90; \$9.25 to \$9.50, fed and watered; \$9.15 f.o.b.; 50c being deducted for heavy, fat hogs, and thin, light hogs, \$2 off for sows, and \$4 off for stags from prices paid for selects.

MONTREAL LIVE STOCK.

MONTREAL, Sept. 13.—At the Montreal Stock Yards, west end market, the feature of the trade was the active demand from packers for canning stock, owing to the fact that they have secured some large orders for all lines of canned beef for export account. Supplies of the above class of stock were very liberal, and in consequence a brisk trade was done in bulls at \$4 to \$4.25, and cows at \$3 to \$3.50 per cwt. Another feature of the market was the scarcity of really choice steers; in fact, there were none on the market, for which there was a fair enquiry from butchers for small lots, who would have willingly paid \$8 to \$8.25 per cwt. Good steers sold at \$7.50 to \$7.75. There was no demand from exporters for cattle.

There was a brisk demand for all lines of small meats and a very active trade was done. Supplies were large, and in consequence the market was easier with sales of round lots of Ontario lambs at \$7.50 to \$7.75, and Quebec stock at \$6.75 to \$7 per cwt. Sheep unchanged at \$4.50 to \$5.50. Calves ranged from 4½c to 9c per pound.

Hogs stronger, and prices, as compared with a week ago, show an advance of 25c to 40c per cwt.

Butchers' cattle choice, \$8 to \$8.25; do., medium, \$7 to \$7.50; do., common, \$2 to \$3; canners, \$3 to \$4.25; butchers' cattle, choice, cows, \$6.75 to \$7; do., medium, \$5.50 to \$6.25; do., bulls, \$5 to \$7; milkers, choice, \$5 to \$8.50; do., common and medium, each, \$7 to \$7.50; springers, \$60 to \$65.

Sheep, ewes, \$5.25 to \$7.50; bucks and culs, \$4.50 to \$5.

Lambs, \$6.75 to \$7.75.

Hogs, off cars, \$9.75 to \$9.90.

Calves, \$5 to \$20.

Good Garden Seed.

Good seed is an important matter with the gardener as well as the farmer. It never pays to buy cheap seed. Experiments were carried on a year or two ago by the Pennsylvania Experiment station with some ten or more strains of cabbage seed of the same varieties from different firms. They found variations of yield from five to ten or fifteen tons an acre, according to the strain of seed. The seed of the highest quality meant several dollars more to the acre in net returns, even to a few cents more a pound.

saving at once. If the newly plowed land is disked thoroughly the same day it is turned over there is less chance of the furrows drying out badly before the land is planted. Newly spaded land should be raked over the same day the soil is turned.

After planting the use of a weeder breaks up the surface and kills many weeds. The cultivator ought to be started as soon as the rows can be seen and used often enough to keep the surface fine, loose and dry.

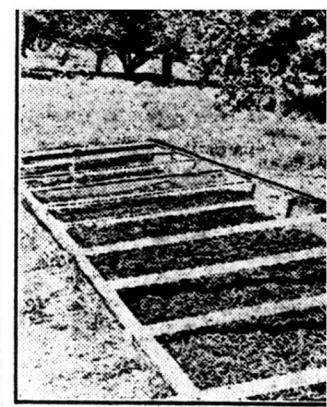

Every rain or shower packs the surface soil, and unless broken up evaporation is very rapid from this compact, moist surface. As soon as the fields can be worked after a rain the cultivator should be used to re-establish the soil mulch. This frequent cultivation not only saves water for plant use, but also is an aid to plant growth and a benefit to the soil.

Never be satisfied with cultivating enough to kill the weeds. Cultivate often enough to maintain throughout the season a loose, dry layer of soil at the surface. Start a soil mulch now and maintain it all summer. It pays, for it means more water for the crops to use.

Protected Hay Entrance.

For convenience in drawing hay into the barn the porch shown herewith will be found very satisfactory. The boom from which the hayfork tackle is suspended extends all the way out to the gable end of the porch. Convenient dimensions for this porch are ten feet each way. This will enable the very largest forkful of hay to be taken in without choking the entrance.

As shown, the porch should be closed with a door hung from hinges above, held in place when closed by

A COLD FRAME FOR NORTHERN LATITUDES

supplied with stable manure a fertilizer containing plenty of phosphoric acid and potash increases yields and insures uniform quality. Use 250 to 400 pounds per acre of this fertilizer, drilling it in each side of the tube through which the beans run. It is not safe to drill fertilizer with the beans, for it is likely to injure the seed.

In northern latitudes use a hotbed cold frame to make the start and a plant seed in the open ground for a session. Early in May cover the surface of a cold frame with interlocking sods cut in squares of about four inches. In each of these plant two three beans. From the start water frequently and admit plenty of air. When the soil outdoors has become thoroughly warm transplant in of ground. The sods are lifted with a spade after watering. Care must be taken not to break the soil or disturb the roots. The lima should be planted in very rich soil with a well balanced fertilizer. Wood ashes are excellent. Hen manure and wood ashes can be used as to give good results. We part of the fertilizer in the soil with the harrow, the balance in the hills furrows.

The two varieties will thrive with simple methods of planting. When growing the pole lima make a furrow three or four inches deep, scatter in fertilizers and mix these with the soil level and firm well; then over it make a mark one or two inches deep and this press the beans, eye down, one two inches apart. Put about half an inch of soil over them and firm well. Set posts over the row and fasten a foot wire netting to them. To this vines are trained as they grow, and are cut off when they reach the top. Judicious pruning is necessary to make them bear well and produce large pods. If poles are easily obtained I have objection to using them, except that the vines require more attention than when trained on trellises. People have used outside rows of corn for a support and also sunflowers, but for a main crop wire netting is most satisfactory.

A considerable quantity of green string beans can be put up by a farm family in a simple canning outfit. The bean is most valuable for canning purposes when the tiny seed has just started to form. Unlike peas it is the tender pod which is valuable for canning. It is the aim of experienced growers to get a uniform, tender, sauté growth of beans, and hence the plant food used should be carefully balanced. Beans must be picked while they are tender and young, before they become stringy. There is comparatively little labor in canning, and prices are on a profitable basis.

ropes attached to the lower corners and fastened on the inside of the barn when the door is shut. The chief advantages of this plan are that the hay tackle is always under cover, so there is no warping of the wooden supports, rusting of the metal nor rotting of the rope. The roof above the porch need not extend more than four or five feet beyond the main roof of the barn. The large dimension is the better.—Orange Judd Farmer.

Making the Little Farm Pay

By C. C. BOWSFIELD

One of the surest and best money-making features on any farm is the bean crop. This product is in constant demand at good prices and may be sold in the general market or put up in cans for private customers.

Two or three acres of common bush beans is not too large a crop for the ordinary farm, and if an acre or even half an acre of pole lima beans can be added the results will be worth while.

While the bean crop seldom fails, caution is needed in planting and fertilizing. The ground must be warm at the outset. The early planting that will pay in handling a crop of beans will not do for beans. It is best to use

light soil which is tilled or elevated enough for drainage. Moisture and richness are required, but the land should not be allowed to become soggy.

In getting ready for a bean crop a good plan is to plow under a piece of cover sod in the fall, putting on a liberal amount of barnyard manure. Disk and harrow the ground in the spring; the crop is not an early one and must have rapid growth. It pays to supply plenty of plant food. A formula containing 2 per cent of nitrogen, 8 per cent of phosphoric acid and 10 per cent of potash gives good results. On land where clover is grown and well

THE FALL ARMY WORM.

Working Its Way Northward—How to Deal With the Pest.

The department of agriculture has warned the farmers to be prepared to meet the attack of the fall army worm, which is coming east and north from Texas.

When they first appear the worms are very small and feed beneath matting grass, etc., but they grow rapidly and suddenly migrate in myriads to the corn or sorghum fields. If the ground beneath the corn rows is grassy the worms will probably originate there and feed there until partly grown before attacking the corn. There is danger, therefore, that before the farmer is aware of their presence he will find his corn stripped to bare stalks and his alfalfa to bare stems.

Where a close examination of a corn-field shows the presence of the fall army worm actually attacking the corn the department recommends dusting them with powdered arsenate of lead, using three to five pounds per acre, mixed with two or three times its weight of flour.

This precaution is, of course, out of the question for forage crops or on corn afterward to be used as fodder on account of the danger of poisoning stock. In such cases 100 pounds of wheat may be mixed with a couple of pounds either of paris green or powdered arsenate of lead, preferably the former, and the whole mass worked into a stiff dough by the use of three to four gallons of molasses and the juice of half a dozen oranges or lemons added thereto. If this is sown broadcast on the ground where the worms are at work they will feed upon it and be killed. This worm, if found, will come to the poisoned bait from distances of from five to ten inches.

In alfalfa fields the immediate cutting and curing of the alfalfa is advisable as soon as the infestation has been discovered. This will not only save the hay crop, but will cut off the food of the fall army worm and check thereby the development of another generation, which may be many times more destructive than the first. As soon as the hay has been removed from the field the ground should be rolled with a heavy roller or brush

"No more headache for you--take these"

Don't just "smother" the headache without removing the cause. Take Chamberlain's Stomach and Liver Tablets. They not only cure the headache but give you a buoyant, healthful feeling because they tone the liver, sweeten the stomach and cleanse the bowels. Try them.

CHAMBERLAIN'S TABLETS

NEW LINGERIE.

Antebellum Underwear Would Be Bulky Now.

ETHEREAL QUALITIES LIKED.

Inset With Filmiest Lace, the 1915 Undergarment Is Fragile, but Lovely, and Suits the Gowns of the Present Season—Resume of Earlier Styles.

"Do with our outer garments what you will," we say, "but don't expect us to adopt antebellum underwear, because we won't consider it!"

Picture those chemises, of thoroughly "durable" material, trimmed with zigzag cotton braiding or the even more horrible cross stitch in colored embroidery cotton!

Think of the long sleeved, ample night robes, with their band collars, buttoned in the front with one button, and their solid embroidery trimming!

Remember the series of petticoats, beginning with a short, scalloped flannel one and continuing outward in layers of starched cotton, and then baste anew those filmy but practical, becoming and altogether comfortable garments which are hidden by the gowns of 1915.

Let us discuss first the wisps of chiffon cloth and chiffon displayed in all seriousness as underwear by the lingerie shops this spring, because they are so exquisite, extravagant and ridiculous.

One set is called "dawn mists" and is worthy of its name. Of filmy rose color, the nightgown, envelope chemise and princess slip are all trimmed with

selves, there are women after all for whom linen remains the material par excellence for underclothes.

The combination underwaist and drawers shown in the illustration is made of finest handkerchief linen with inserts of filmy filet lace with edgings of val. The waist and drawers are attached together by beading through which ribbon is run. Ribbon quite broad, about an inch, is run through the openwork of the lace on waist and drawers.

Featherstitching and hand run tucks form the only decoration of some of the new French "dessous." Many gowns and chemises have no ornamentation at all except large buttonholes in an empire line through which are drawn inch wide pink ribbons. Filet lace and Russian lace are substantial in wearing qualities and look ephemeral.

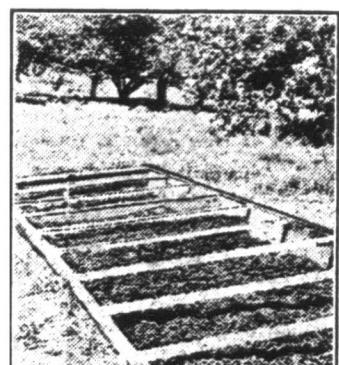

The favorite envelope chemise, which has been adopted with so great an enthusiasm, is procurable now in different priced qualities of handkerchief linen, as well as in the bumbler batiste, in both the mercerized and unmercerized varieties.

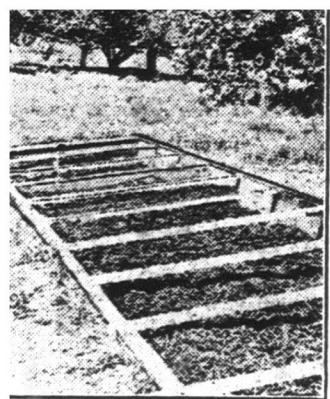

FLORAL CENTERPIECES.

Poetry and Beauty Lie Even in the More Commonplace Flowers.

To hark back to unusual floral centerpieces, have you ever thought what can be done with tulips in the springtime or even now when they are to be had? If you haven't, try massing them in a flat bowl of sand instead of in high glass vases of water, and then collect smaller vases or glasses that harmonize with your bowl, stick a single tulip in each one and set them around your table among lighted candles.

Tulips are stately flowers, and there is something regal in their coloring and the fling of their brilliant heads. Choose the variegated ones for your table and when the candles are ablaze

COLD FRAME FOR NORTHERN LATITUDES.

Applied with stable manure a fertilizer containing plenty of phosphoric acid and potash increases yields and insures uniform quality. Use 250 to 400 pounds per acre of this fertilizer, drilling it in on the side of the tube through which the beans run. It is not safe to drill fertilizer with the beans, for it is likely to injure the seed.

In northern latitudes use a hotbed or cold frame to make the start and also plant seed in the open ground for succession. Early in May cover the surface of a cold frame with inverted flats cut in squares of about four inches. In each of these plant two or three beans. From the start water frequently and admit plenty of air. When the soil outdoors has become thoroughly warm transplant in open ground. The sods are lifted with a spade after watering. Care must be taken not to break the soil or disturb the roots. The lima should be planted in very rich soil with a well balanced fertilizer. Wood ashes are excellent manure and wood ashes can be used as to give good results. Work half of the fertilizer in the soil with a harrow, the balance in the hills or rows.

The two varieties will thrive with simple methods of planting. When sowing the pole lima make a furrow six or four inches deep, scatter in fertilizers and mix these with the soil, and firm well; then over it make dark one or two inches deep and in it press the beans, eye down, one or two inches apart. Put about half an inch of soil over them and firm well. Posts over the row and fasten six strands of wire netting to them. To this the vines are trained as they grow, but cut off when they reach the top. Luscious pruning is necessary to make them bear well and produce large pods. Poles are easily obtained. I have no objection to using them, except that vines require more attention than when trained on trellises. People have outside rows of corn for a support and also sunflowers, but for the most part the crop wire netting is most satisfactory.

A considerable quantity of green beans can be put up by the family in a simple canning outfit.

The bean is most valuable for canning purposes when the tiny seed just started to form. Unlike peas, is the tender pod which is valuable canning. It is the aim of experts to get a uniform, tender, sap-growth of beans, and hence the best food used should be carefully selected. Beans must be picked while they are tender and young, before they become stringy. There is comparatively little labor in canning, and prices on a profitable basis.

Worms are at work they will feed upon it and be killed. This worm, if it has been found, will come to the poisoned bait from distances of from five to ten inches.

In alfalfa fields the immediate cutting and curing of the alfalfa is advisable as soon as the infestation has been discovered. This will not only save the hay crop, but will cut off the food of the fall army worm and check thereby the development of another generation, which may be many times more destructive than the first. As soon as the hay has been removed from the field the ground should be rolled with a heavy roller or brush dragged, or the poison bait can be used.

The habit of the moths of descending an inch or two into the ground in order to pass into the pupal state is of great importance in their control. It has been estimated that shallow cultivation will destroy from 50 to 90 percent of the insects at this time, the efficiency of the measure depending upon the thoroughness with which the work is done. In alfalfa the use of the spiked tooth harrow or the alfalfa cultivator is best unless it is known that disking is not injurious to plants.

Cultivation of the ground between the rows of corn has been found to destroy nearly all of these pupae, thereby preventing the development of another generation. Ordinarily there are from three to four or even five generations of the fall army worm in the course of a year, the damage done increasing as each successive generation spreads.

When fields are threatened with invasion, but have not as yet become actually infested, a deep furrow should be plowed out around the entire circumference of the field. Into this furrow the advancing worms will fall. They may then be killed by dragging a heavy log through the furrow, or in sections where irrigation is possible the furrow may be filled with water and a small quantity of kerosene sprinkled over the surface. This will kill the worms almost instantly.

The fall army worm when a full grown caterpillar is about one and a half inches in length. The body is striped on a ground varying in color from a pale yellowish brown to black, more or less streaked and intermixed with dull yellow. On each side there is a broad yellow undulating line more or less strongly mottled with red. When very young, however, the caterpillar is nearly black. The worm will attack almost any form of vegetation that is encountered and owes its name to the fact that, except in the extreme south, it does not appear until very much later in the season than the common army worm, which it closely resembles.

Mother Love.

"Mother machree," he said. "Tis worn and torn your heart is for love of us all."

"Jerome avick," I said to that. "Tis worn and torn the hearts of mothers were before me and will be again. God help their children if they're not." —From "Mother Machree," by James E. Connolly, in Scribner's.

Height of Annoyance.

"I'm mad at my wife. To anger her I shall flirt with some other woman."

"If you want to make her absolutely furious ask some other woman to sew on a button for you."

**Children Cry
FOR FLETCHER'S
CASTORIA**

nel one and continuing outward in layers of starched cotton, and then bless anew those filmy but practical, becoming and altogether comfortable garments which are hidden by the gowns of 1915.

Let us discuss first the wisps of chiffon cloth and chiffon displayed in all seriousness as underwear by the lingerie shops this spring, because they are so exquisite, extravagant and ridiculous.

One set is called "dawn mists" and is worthy of its name. Of filmy rose color, the nightgown, envelope chemise and princess slip are all trimmed with nothing but wide hems of their own material, through which are run the thinnest of white satin ribbons.

Other sets, in empire form, are decked with groups of tiny chiffon roses. Some are inset with finest valenciennes.

A bit less ethereal and really very wearable and alluring are the crea-

more commonplace flowers.

To hark back to unusual floral centerpieces, have you ever thought what can be done with tulips in the springtime or even now when they are to be had? If you haven't, try massing them in a flat bowl of sand instead of in high glass vases of water, and then collect smaller vases or glasses that harmonize with your bowl, stick a single tulip in each one and set them around your table among lighted candles.

Tulips are stately flowers, and there is something regal in their coloring and the fling of their brilliant heads. Choose the variegated ones for your table and when the candles are ablaze see if the effect is not one of what Mr. Kipling would call "truly oriental splendor."

Yellow has long been a favorite color scheme for the table, and yet there are ways and ways of using yellow. Cut glass has been voted a soulless thing, cold and unimaginative, and yet one woman who used her ever active brain to plan feasts for the eye fairly took away her guests' breath by a recent spectacular arrangement of a crystal laden and yellow decorated dinner table.

Yellow shades softened the flare of lights to a mellow glow. Yellow roses banked in a crystal basket formed the centerpiece, and more yellow roses nodded from cut glass vases, set here and there and everywhere. Yellow tied favors and place cards, each with a touch of yellow, gleamed among the rows of glasses at each table. And broad bands of yellow satin ribbon broke the even whiteness of the cloth, their reflection in the glistening glass adding to the colorfulness of it all.

Did it ever occur to you, you hostesses seeking after novelty, that a combination of purple and yellow flowers on a table is as charming as it is rare? Purple and gold are used for kings' robes, and yet in the tiniest gardens in season grow daffodils and violets, pansies both purple and yellow, heliotrope, dwarf sunflowers and sometimes yellow roses, while along the country roadsides may be had for the mere joy of picking them buttercups and dandelions.

And, after all, it is cleverness in making use of the everyday things that often counts for most. One of the prettiest shower bouquets imaginable for a bride was made up in a little Maine village of that featherly white wild carrot, known more poetically as queen's lace.

Cedar Chest.

Get or make a large pine box of desired size. Hinge on the cover neatly, and if there are any cracks or holes putty them up; paint the outside of the chest; get some oil of cedar of the druggist and paint the inside with it, using plenty of oil. This will soak into the pine and retain the odor for years.

tions of chiffon cloth, much like indestructible voile, which are found in lovely one colored sets, or in white grounds with groups of Dresden flowers in pastel shades, or in the more startling Poiret bouquets.

Some models are just touched with filet lace, for this variety is enjoying a great vogue just now, and appears also combined with crepe de chine, handkerchief linen and batiste.

Crepe de chine as a material for underclothes is thoroughly established. The charming, almost untrimmed models in the heavy quality, which were seen all last winter, are giving way to the lighter weights, lace trimmed or ribbon run, which are more appropriate to the warm weather.

Untrimmed garments in this weight are also procurable for those who have adopted the simple line in lingerie, which the pussy willow taffeta, requiring no ornamentation beyond its beautiful self, first taught us to like. Advocates of crepe de chine for summer wear—and there are many—extol its noncrushable qualities.

It is well to remember in buying silken undergarments that a flesh color or pink is preferable to white, as washing only makes it prettier, while the white is almost sure to become yellow after laundering.

Lovely as the silken materials are, practical as they have shown them-

ANNOUNCEMENT

The following prices f.o.b. Ford, Ontario, effective Aug. 2, '15

Ford Runabout . . .	\$480.00
Ford Touring Car . . .	\$530.00
Ford Town Car . . .	\$780.00

No speedometer included in this year's equipment; otherwise cars fully equipped.

There can be no assurance given against an advance in these prices at any time. We guarantee, however, that there will be no reduction in these prices prior to Aug. 1, 1916.

Profit Sharing with Retail Buyers

On August 1, 1914 we made the announcement that if we could make and sell at retail 30,000 Ford cars between August 1, 1914 and August 1, 1915 we would share profits with the retail purchasers. We have sold only 18,774 Ford cars in the time specified and, therefore, are unable to share our profits with those who purchased Ford cars between the above dates.

Our plan to profit-share with retail purchasers of Ford cars during 1914-1915 was not successful due to conditions which we could not possibly foresee at the time we made our announcement last August. The war and the consequent unsettled conditions of business seriously affected our sales and increased our manufacturing costs so that during the last year we did not earn a profit not required for the normal expansion of our business in a manufacturing and service way.

However we still have confidence in our profit-sharing plan, but a realization of the uncertainty of conditions generally makes it advisable to defer any announcement of future profit-sharing until a later date.

We are, however, positive we cannot reduce costs for several months, and therefore can offer no profit-sharing for cars delivered during August, September and October, 1915.

W. J. NORMILE, Dealer, Napanee, Ontario.

F. E. VANLUVEN.

The Rev. Mr. Langford, of Toronto, will speak in the Grace Methodist church at the three services, 10:30 a.m., 2:45 p.m., and 7 p.m.

The family of Mrs. Sidney Warner and Mr. Harvey Warner wish to thank their many friends for their kindness to them in their recent bereavements.

The ladies of Selby are arranging to serve luncheon at the school fair, to be held on Sept. 23rd at Selby. Adults 25 cents. Proceeds to be donated to Red Cross Fund.

The Red Cross Workers of Tamworth will serve luncheon at Tamworth at school fair to be held at Tamworth Athletic Grounds on Sept. 24th. Proceeds to be donated to Red Cross Fund.

At a meeting of St. Andrew's Church Congregation held last Monday evening the Rev. A. J. Wilson, M.A.B.D., formerly of Nova Scotia, and a recent graduate of Queen's University, was extended a unanimous call to be their minister. The Presbytery of Kingston met in St. Andrew's Church, Belleville on Tuesday last when the call was handed to Mr. Wilson. After the usual formalities he decided to accept the call. The induction will take place on Monday evening, Sept. 27th, at 8 o'clock.

We bid you a hearty welcome to Picton Fair. We want you to be one of the jolly fun loving crowd, that will take in the Str. Brockville's Excursion to Picton next Wednesday Sept. 22nd. We've tried to make it interesting, attractive and instructive all through the many exhibit—the amusements—the races—and every one of the many fair features. Again we bid you welcome.

W. H. GOUGH, President.
A. P. MACVANNEL, Secy-Treas.

The license of Jas. McVicar, license holder of the Paisley House, Napanee, has been suspended for 4 weeks from September 11th; and his bartender, Harry Dubey, has suffered the same penalty. McVicar entered into an agreement with the other Napanee hotelkeepers not to sell liquor to soldiers. He broke the agreement. The commissioners found his explanation unsatisfactory. He stated that he understood that the agreement had been cancelled for the day, being the occasion of a route march.

Chairman Elavelle said that the board was determined, in cases where hotelkeepers had entered into an agreement, such as in Napanee, to stand firmly behind them, and this resolution would be all the stronger where military regulations were involved, as in towns ordered dry near military camps.

Leave your order for flowers at WALLACE'S Drug Store Limited, agents for "Dunlop's" Canada's greatest wedding and funeral floral designers.

The town sprinkler-men, Messrs. Killorin and Chatterson, kept the road in front of the fair grounds well sprinkled on Wednesday afternoon, adding much to the comfort of the patrons of the fair and the ticket-sellers.

All interested in Red Cross work kindly attend the Public Meeting to be held in the Town Hall, on Saturday afternoon, Sept. 25th, at three o'clock, to discuss the donation of a Motor Ambulance, to the front.

Hear Mr. Herbert K. Caskey, General Secretary Laymen's Missionary Movement, Canadian Council, in St. Andrew's Presbyterian church, both morning and evening. This is a great opportunity to hear a great man. Everybody made welcome.

There will be a grand sacred concert and organ recital given in St. Andrew's Presbyterian church on Friday evening, Sept. 21st at 8 o'clock. This is a treat to look forward to. Be sure and reserve the date for the sacred concert. Programmes will be printed early next week.

At the recent summer school examinations in Toronto, Miss Norma Shannon successfully passed her examination as a supervisor and specialist in art, entitling her to teach art in any high school or Collegiate Institute. But five pupils of the school passed this examination.

The late Bafrant B. Van Slyck died at his late residence, Dundas street, Sept. 13th, 1915, at the ripe old age of 82 years and ten months, after a long illness, which was borne with much patience. He leaves to mourn his loss one daughter, at home, one son four brothers, one sister, and several grandchildren. He was the oldest son, and one of thirteen children. He was born at Kinderhook, in the State of New York, and lived there till the family moved to Canada in the year 1843. He was converted through revival services which were being conducted by Rev. Mr. Young in the year 1863, and was always a faithful follower of the Lord. He lived in Morven until the year 1901 and was a successful farmer and a reformer. He moved to Napanee with his daughter, Mary, and lived a retired life.

DO YOU WANT TO SEE A GOOD HORSE RACE.

this Fall? Then take in the Str. Brockville's Excursion to Picton Fair on Wednesday, Sept. 22nd. There will be stepping by steppers that step on that day, and the 2:30 and other races will surely please you. You cannot afford to miss this delightful days outing, which will be the last and best of the season. Good meals, at all hours served in dining hall on Fair grounds.

The Canadian Government Offers Suggestions for Fruit Preserving.

In an advice circulated throughout Canada, the Fruit Branch Dept. at Ottawa suggests as being best for preserving purposes, certain brands of peaches: St. Johns, Elbertas, Crawfords and Smucks, and for plums, Bradshaws, Gages, Lombards, Reine Claude.

The advice is timely and to it may be added that many of the most successful makers of preserves have for years insisted on securing from their grocers the St. Lawrence Extra Granulated Sugar (Pure Cane).

It is well known that the slightest organic impurity in sugar will start fermentation in the jam, and St. Lawrence Sugar which tests over 99% pure has never failed the housewife. Grocers everywhere can fill orders for this sugar. The best way to buy it is in the original refinery sealed packages 2 or 5 lbs. cartons, 10, 20, 25, and 100 lb. bags.

Bathing Caps. You get them at HOOPER'S.

The Late Harvey Warner.

Long before he moved to Napanee in 1887 Harvey Warner was well known as a genial and generous gentleman and that reputation has been fully established many times over during his residence in our town. By his thrift and business ability he had amassed quite a fortune and was at the time of his death the wealthiest man in the County. No citizen of Napanee has ever displayed the same liberality in his generous contributions to the poor. There were many substantial gifts such as the Harvey Warner Park, the greater part of the fund which built the Public Library and his frequent donations to Trinity Church which could not escape public notice; but it was not his wish that any of his benefactions should be made known. Hundreds of poor people have year after year shared in his bounty. He took delight in giving yet always gave in the most unostentatious manner. None were too poor to receive from him a pleasant greeting and a warm clasp of the hand. He was born at Wilton on the 23rd of January, 1833 and was the son of the late Sidney Warner and Maria Lampum. His father was a pioneer merchant and one of the most prominent men of the United Counties of Frontenac, Lennox and Addington. Before the separation he was one of the few to be elected Warden of our own county for a second term. Mr. Harvey Warner although a staunch supporter of the Liberal party could never be induced to accept any public office. His name will nevertheless be treasured in the hearts of the people of Lennox and Addington as one of their most valued and upright sons.

will be complete with innocent amusement, Entertaining Features, delightful pastime, instructive departments from beginning to end. The band concerts by the famous 48th Highlanders' Band of Toronto, will be well worth a trip to Picton alone to hear. Therefore you cannot afford to miss this great treat provided for you by our sister town of Picton. The Str. Erockville's excursion to Picton is on the 2nd day of the Fair, Wednesday, Sept. 22nd.

Trinity Church Notes.

Rev. A. L. Phelps, B.A., of Adolphustown, occupied the pulpit here last Sunday and preached two able and interesting sermons. The pastor will begin a series of Sunday evening sermons next Sunday on Bible characters.

The aim of these sermons will be to gather practical, helpful lessons for everyday life. These Sunday evening talks will be of special interest to young people. The first of the series will be on Joseph. Let all the members and adherents of the church be present at both services. Be loyal. On Monday evening next Sept. 20th, there will be a social gathering of the young people of the congregation. There will be music, brief addresses and light refreshments. Let all the young men and women of the congregation be present. The Rally Day services in connection with the Sunday school, will be held on Sunday Sept. 26th. A splendid programme is being prepared. The services will be held in the auditorium of the church.

Tennyson Evening in Grace Methodist Church.

On Monday evening next, Tennyson evening in Grace Church, the Literary Committee of the League of Grace Methodist Church are holding a "Tennyson evening" to which they invite the general Public.

The programme—

Hymn—"Strong Son of God."

Poetry—The Pastor.

Life of Tennyson—Miss Florence Gibbard, B.A.

Solo—"The Brook"—Mrs. W. Jewell.

Recitation—"Break, Break, Break." Miss Rowena Smith.

Reading—"Dora" Miss M. Green

Quartette—"Sweet and Low." Misses Oliver and Wallbridge.

Messrs. Wiseman and Paul.

Interpretation of Enoch Arden, with lantern slides—Miss Myrtle Stevens, B.A.

Recitation—"Charge of the Light Brigade." Mr. Egerton Boyce.

Duet—"Crossing the Bar." Misses Paul and Green.

Hymn—Holy, Holy, Holy.

Benediction—

RURAL SCHOOL FAIRS.

Mr. G. B. Curran, of the Department of Agriculture, last week attended the conference at Guelph of the District Representatives, employed by the Ontario Department of Agriculture. The meetings were held at the Ontario Agricultural College, and forty men were in attendance. The principal line of work discussed was the Rural School Fair movement. In Ontario this year 234 School Fairs are being held. Lennox and Addington county is second in Ontario in the number of School Fairs to be held, with 10.

The dates set for the School Fairs in this county are as follows: Camden, Centreville, Sept. 20th; Richmond, Selby, Sept. 23rd; N. Fredericksburgh, Sept. 27th; Kaladar, Oct. 5th; Newburgh, Oct. 16th.

The Red Cross Society

A large work-meeting was held last Saturday afternoon, when the socks were filled with Christmas gifts for the men at No. 5 Stationary Hospital, (Queen's) at Cairo. It was perhaps one of the happiest meetings that has been held, each one working with a will, to bring some comfort to our brave men at the front. The Society wishes to thank Mrs. J. W. Robinson, and her committee, and all who kindly contributed to this worthy cause.

The annual meeting of the Red Cross Society will be held in the town hall on Saturday afternoon, September 25th at two o'clock, when a full report of the year's work, will be given and plans for the future will be made.

To all the Red Cross Branches and Women's Institutes: It has been proposed to donate from the Red Cross Branches and Women's Institutes of the County of Lennox and Addington a motor ambulance, to be called "The Lennox and Addington Ambulance." To carry out this plan (which has been approved by the Head Office, in Toronto) it will be necessary to form a Central Committee, consisting of one or more representatives from each society. Would you kindly, therefore bring this matter before your Society and appoint your representatives to attend a meeting to be held in the town hall, on Saturday afternoon, September 25th, at three o'clock, for the purpose of discussing the subject? Your attendance at the meeting, will not necessarily mean your approval in the matter.

The Red Cross rooms will be open this Saturday morning as usual. A special work-meeting will be held in the afternoon and ice-cream will be served.

On the evening of Sept. 8th, a few of the friends of Mr. and Mrs. A. R. Sexsmith gathered at the home of Mr. O. S. Davis, South Napanee, and presented the newlyweds with a Kitchen Shower. A very pleasant evening was spent in music and games. The presents were as follows: Mrs. Nelville Timmerman, Odessa, table cloth, silver pie spoon, state spoon, berry spoon, silver butter knife and sugar shell. Mrs. H. A Warning to Farmers.

Thousands of farmers have lost thousands of dollars this year through smut in wheat, oats and barley.

This loss can be prevented in ONE WAY ONLY, and that is by treating the seed. Be sure, therefore, that your fall wheat is properly treated before being put into the ground this fall.

There are two methods of treating the seed, as follows:—

1. Mix 1 pint of formalin with 40 gallons of water. Place the grain to be treated in a heap on a clean canvas or floor. Sprinkle the formalin solution over the grain, then shovel the grain over into another pile so as to mix it thoroughly, then sprinkle and shovel again. Repeat this until every grain is moistened by the solution; then cover the pile with sacking and leave for three or four hours. At the end of this time spread the grain out thinly to dry; shovelling it over three or four times will hasten the drying. Forty gallons of the formalin solution is sufficient to sprinkle between thirty and forty bushels of grain, smaller amounts in proportion.

2. Mix one-half pint of formalin in 21 gallons of water. Place the seed to be treated in a coarse sack; a bran sack is excellent for the purpose. Fill the sack about three parts full and immerse in the formalin solution for twenty minutes. During the treatment raise the sack up and down several times in the solution to insure wetting every grain that it contains.

After treating, spread the grain out thinly on a clean floor or canvas where it can be stirred and allowed to dry sufficiently to be sown. The sooner it is sown after treatment the better. Twenty gallons of the solution will treat about 20 bushels of grain. Several treatments may be made with the same solution; each lot will require to be immersed for twenty minutes.

For further information apply to:—

FAIR DAY.

The day at Budgeon's drug store in aid of funds for supplies to our soldiers and sailors overseas, held there on the 15th inst., was an encouraging success. We wish to express our sincere appreciation to Mr. and Mrs. Budgeon for their untiring efforts in our behalf, and for the kind assistance rendered us in many ways.

We also desire to thank very heartily, Mr. McGregor, of Messrs. McIntosh Bros., for his kind assistance to us on this and previous occasions.

Our appreciative thanks are also extended to the young ladies and others, who so ably assisted us, and to all, who by their presence, or otherwise, so generously aided us.

Our room is open as usual, every Thursday and Saturday until 5.30 o'clock. On Thursdays light refreshments are served. Come and help our good work.

Before painting your house or barn, ask about qualities and prices in paint goods at HOOPER'S—The Medical Hall.
